

Know your future sales, and what to do about them

Frivind Retail Forecasting:

Our solution offer retail chains, producers and logistics operators the most accurate sales- and demand forecasting available today. By utilising machine learning, weather forecasts and our enriching variables, we enable increased sales while reducing stock levels and waste.

See what customers are saying:

"Frivind allows us to subtract the weather effect from historical sales to plan better for next seasons. This combined with a short term forecast adjusted for weather effects gives us a demand forecast that would have been impossible to achieve manually"

– Head of demand planning, Large Norwegian Producer

WHAT WE OFFER

- Frivind provide short and long term forecasts with a high level of detail. Being able to stock exactly what you need, will let you sell more of the items in high demand while reducing inventory of the rest. Always adjusted to time of year, trends, seasons and more.
- Frivind Forecasting algorithms uses external data like weather forecasts as well as your internal campaigns (and a lot more!) to fine tune the forecast every hour or day.
- Our solution is used by large retail chains, ice cream producers, distributors and amusement parks. Planning sales, staffing and funding never got more accurate.
- The solution can be integrated with your existing IT-system (or standalone). Built on Microsoft Azure, this solution is highly scalable and ready for large tasks

Why Microsoft Azure?

Be future-ready

Continuous innovation from Microsoft supports your development today, and your product visions for tomorrow. With 1,000+ new capabilities in the past year, you can build on the latest advancements in AI, blockchain, Kubernetes, containers, and databases to keep you ahead of the curve.

Our enterprise grade analytics solution outperforms the competition, costs less, and is fully compatible with your existing development, BI, and data-science tools.

Operate hybrid seamlessly

On-premises, in the cloud, and at the edge—we'll meet you where you are. Integrate and manage your environments with tools and services designed for hybrid cloud.

Enhance security, simplify access, and set smart policies across your different environments with a single-identity platform trusted by 90% of enterprises globally.

Build on your terms

You have choices. With a commitment to open source and support for all languages and frameworks, build and deploy how you want to. Take advantage of the full-featured, integrated development environments with built-in support Visual Studio and Visual Studio Code, the most popular IDEs trusted by 15M+ developers.

We embrace open source, drive innovation through collaboration, and contribute back to the community.

Trust your cloud

Get security from the ground up, backed by a team of experts, and proactive compliance trusted by enterprises, governments, and startups.

With a \$1B+ investment in security R&D and 3,500 cybersecurity experts, security is foundational for Azure.

Microsoft Azure is an ever-expanding set of cloud computing services to help your organisation meet its business challenges. With Azure, your business or organisation has the freedom to build, manage, and deploy applications on a massive, global network using your preferred tools and frameworks.
