

Demand Forecasting & AI-enabled Sales & Operations Planning solution

Many enterprises often struggle to meet high and variable market demand due to changing market & demand trends, leading to reduced customer service levels, working capital concerns, and lost sales.

Orchestrate and drive supply and demand consensus with AI-enabled sales and operations planning (S&OP) solution

Optimize your supply chain planning to win at the last mile with our integrated S&OP solution

- **Demand consensus:** Analyze any deviations in forecasts to avoid disruption and seamlessly incorporate price interventions and promotions, so you can reduce inventory-related costs.
- **Demand-supply consensus:** Leverage the demand-supply consensus module of our integrated S&OP solution to arrive at a consensus on your demand plan.
- **Execution monitoring:** The execution monitoring module of our AI-powered sales and operations planning solution helps you tackle the deviations between demand and planned demand in real time.
