

Tools for the Protected Data Age

Karlsgate

Enabling data connectivity while protecting personal information

Privacy-by-Design
Technology

Enabling
Zero-Trust
Data Sharing

IMMEDIATELY SAVE COST & TIME

to securely interoperate your data across partners, cloud solutions, and internal systems by automating the data integration steps and freeing up your IT resources for other projects.

SAFELY CONNECT DATA AT SCALE

with any data source while ensuring compliance with HIPAA, GDPR, CCPA, and other regulations.

EMPOWER YOUR BUSINESS USERS

to access and integrate data sources through a **NO-CODE**, UI-driven system designed for their specific needs.

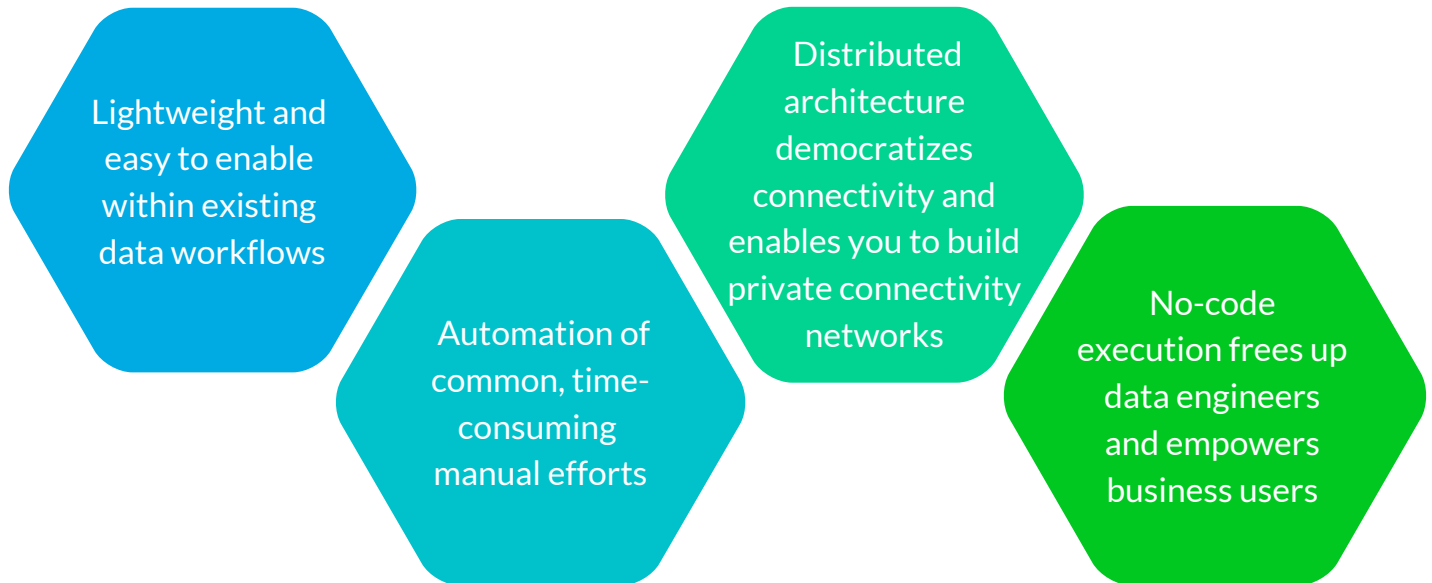

HANDLE REAL-WORLD COMPLEXITY

by automatically cleaning, correcting, and standardizing your data for integration with other data sources.

SOLUTIONS THAT SCALE DATA CONNECTIVITY...

KarlsGate's next-gen technology was designed to provide a privacy-enhancing layer that is easily integrated into all data operations - allowing a free flow of insights while maintaining control of sensitive information.

...FOR WHATEVER PATH BEST SUITS YOUR NEEDS

ZERO-TRUST DATA CONNECTIVITY

Get valuable insights without sharing or exposing Personal Data. Match data anonymously on-the-fly using patent-pending Cryptoidentity technology.

Ensures the highest level of security and compliance

Built-in cryptography ensures that no party - including KarlsGate - can re-identify any data

PRIVACY-BY-DESIGN DATA INTEGRATION

Built-in data transfer automates much of the security and networking friction

Data is always stored de-identified with site-specific tokens

Flexible token recipes
