MTI Ltd.

ARVI

"ARVI" is a solution that supports daily flight operations by airline operators to check routes, flight plans, various aviation weather data, and aircraft location information on a single screen.

The 3 features are designed to help you make the best decision.

01

Route & Weather Data

02

High-speed data display

03

Intuitive UI

3D ARVI

"3D ARVI", 3D Aviation Weather Service, specializes in weather phenomena that have a significant impact on flight operations, and by rendering these phenomena in 3D, it is easy to intuitively grasp and understand where to avoid, making it ideal for briefing operations and other tasks.

The 3 main features of 3D ARVI

01

Visualize Weather in 3D

02

Improve dispatch briefing efficiency

03

Call attention to Aircraft Triggered Lightning*

* clouds that generate lightning when an aircraft approach
