

# MAKE YOUR AZURE JOURNEY A SUCCESS

Achieve More Success in the Public Cloud while Unlocking Business Values with AzureSimple

If there is one constant about the cloud, it's complexity. Migration to Microsoft Azure should deliver benefits like cost savings and improved efficiency. However, many organizations are unable to enjoy a reasonable time-to-benefit due to the complexity inherent in the cloud. Often, these complex challenges center around three main concerns: Cost, availability, and security.

**AzureSimple** is SoftwareONE's usage-based subscription service to help you maximize the value of Microsoft Azure. Depending on your Azure maturity, AzureSimple is your starting point to migrate your workloads, get your financial operations optimized and released from your operation burden through our managed services.

AzureSimple is a usage-based subscription service designed to help organizations make the most

of Microsoft Azure. This solution is designed to help organizations of all sizes gain actionable recommendations to better manage cloud spend and enjoy a more streamlined cloud journey.

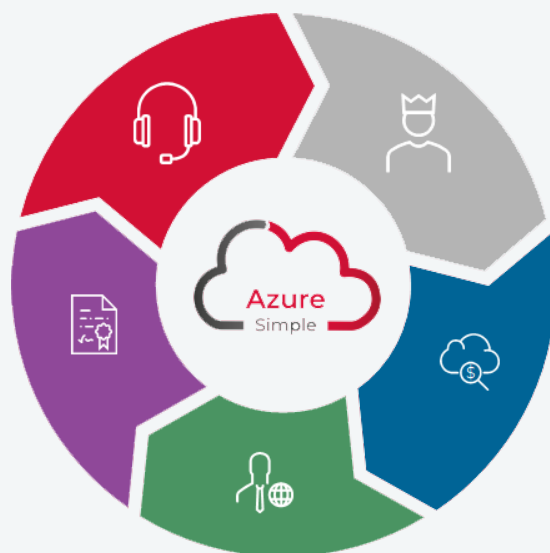

In its most basic form, AzureSimple provides a standard suite of services designed to promote cloud visibility, cost optimization, and ongoing availability. We help you cut through the complexity of your Azure environment by providing subscription billing, 24x7 multi-language support and cost governance.

Whether you need a lift-and-shift migration or a full-on transformation of your software estate, AzureSimple contains the power and flexibility you need. By taking the complexity out of the equation, your business can change its focus to long-term transformational goals.

## AzureSimple | Key Components

AzureSimple is a highly flexible solution designed to meet the unique needs of your business. Take a look at the standard features:

- **24x7x365 Cloud Support** – Whether you need help at 1 pm or 1 am, our team of seasoned experts around the globe is ready to take your call.
- **Access to Global Service Success Manager** – Get relevant quarterly business reviews from a single point of contact. Additionally, they will help you manage and escalate any support issues.
- **Microsoft Premier Support** – If your support inquiry is especially challenging, we'll automatically escalate your issue to Microsoft and have your Service Success Manager work with them directly to gain a resolution.
- **Cost Governance** – Monitor your cloud usage and proactively manage spend with access to our proprietary PyraCloud platform.

## AzureSimple | Add-On Services

No matter where you are on your personal Azure journey – it's crucial to make the best out of your investment. On top of the above described core components within AzureSimple, we provide additional values so you can make the most of the Azure platform:

 <p><b>CLOUD STARTER PACK</b> for new Cloud Customers</p> <p>If you're still planning your Azure migration, this add-on will help you start off on the right foot. Get access to governance recommendations, a TCO analysis, provisioning services, and more.</p>	 <p><b>CLOUD ACCELERATOR STARTER PACK</b> for existing Cloud Customers</p> <p>Already on your journey to cloud migration? This pack is designed to help you accelerate your time-to-benefit and mature your approach to usage and adoption.</p>	 <p><b>FINOPS STARTER PACK</b> for mature Cloud Customers</p> <p>If you want to optimize an existing deployment, our FinOps starter pack contains the tools you need to simplify the management of cloud financial resources.</p>

## Realize the True Benefits of Microsoft Azure

When you implement AzureSimple, you'll gain a few impactful benefits right away. Here's a closer look:

- Rein in Cloud Spending – Make the most of your cloud investment. You'll receive consistent cloud usage reports, timely alerts for important issues, and relevant cost optimization recommendations through your Service Success Manager and PyraCloud platform.
- Fast and Knowledgeable Support – Your business needs reliable and efficient assistance. Our team of experts are available 24x7x365 and will help you respond to your emergency events in less than 30 minutes.
- Collaborate with a Service Success Manager – Get expert security, cost optimization recommendations, and support through a dedicated manager. Further, they'll help ensure you're getting the service level you agreed to.
- High Availability – Your cloud deployment should be functional, effective, and free from threats. Through the power of AzureSimple services, extended downtime will be a distant memory.
- Pay for What You Need – You shouldn't have to pay for cloud usage or application features you don't use. AzureSimple is designed to help your business gain the exact capabilities they need.
- Ensure Compliance – AzureSimple is a Certified Information Security Management System according to ISO 27001:2013 and ISO27017 SOC 2 Type 1. This will ensure your business is protected against both malicious actors and auditors.

Organizations shouldn't settle for a standardized, one-size-fits-all solution. With AzureSimple, you'll gain a suite of services that are custom designed for your immediate needs. We've helped over 5 million managed workplace users make the most of their deployment, saving companies over \$455 million to date. If you're ready to join them in embracing cloud savings and simplicity, reach out to SoftwareONE today.
