Modernize Communications

Microsoft Teams Voice-In-a-Box

Overview: Teams Voice In a Box

Today, now more than ever, maintaining and fostering a collaborative team environment across a dispersed workforce is an immense challenge for organizations of any size. Finding, implementing and adopting a user-friendly solution for communications is no small task.

Microsoft Teams has a goal of uniting workforces like yours with powerful solutions like Teams Voice. Before moving forward with a full deployment, Oakwood's Teams Voice In a Box allows clients a test drive to help determine if Teams Voice is the right fit and how to properly deploy the solution.

During this 2-week engagement, Oakwood's Team will work with your internal stakeholders in evaluating the functionality and features prior to a full deployment.

Our PoC process includes; **Planning, Analysis & Configuration**, and **Findings**.

Planning: Teams Voice In a Box

- Review expectations, goals, scope, and deliverables
- Introduce stakeholders and establish meeting expectations and cadence

Analysis & Configuration: Teams Voice In a Box

- Five days of analysis and configuration of the Teams Calling environment
- Direct routing configuration and enablement of up to 10 users
- Configuration of PSTN in/outbound calling
- Extension to extension dialing with 3rd party PBX

Findings: Teams Voice In a Box

- Review of the environment
- Findings from the PoC
- Recommendations and next steps

Thank You!
