

Microsoft Endpoint Manager

Flexible mobile device and app management that let employees work the way they choose.

Modern workplace demands a new approach to management and security, and more alignment across productivity tools. End users now have the flexibility to work from anywhere on any device, and IT is still responsible for security of all corporate data, wherever it lives. Only Microsoft provides the most complete and most secure device management for the modern workplace and helps organizations realize fastest time to value from their Microsoft 365 investment. Microsoft Endpoint Manager is the industry-leading solution that enables users and protects data across mobile devices, PC desktops and mobile applications.

Microsoft provides the best platform to manage Windows as a service for IT organizations, and to help realize the promise of cloud-based endpoint management

Extends the value of existing management infrastructure by attaching the power of Microsoft 365 cloud for automation and intelligent security insights

Ensures security and compliance at all levels, starting with the device itself, and responds in real-time to the ever-changing threat landscape with integrations between Microsoft Endpoint Manager, Azure Active Directory and Microsoft Threat Protection

How Harmony Mobile integrates with Microsoft Endpoint Manager to enable a secure mobile workforce

Check Point Harmony Mobile is an innovative approach to mobile security that detects and stops attacks on iOS and Android mobile devices before they start. Harmony Mobile protects against malicious apps, phishing campaigns aiming to steal corporate credentials, Man-in-the-Middle attacks and OS exploits, among others. Combined with Microsoft Endpoint Manager, the solution provides full visibility of mobile threats and dynamic security that keeps sensitive data secure.

CUSTOMER BENEFITS

- Real-time Threat Prevention, leveraging Check Point's threat intelligence and cyber security engines to offer the highest threat catch rate in the market.
- Complete visibility on mobile threats and granular policy setting on the cloud-based dashboard.
- Elegant user experience, simple deployment and seamless integration with Microsoft Endpoint Manager, enabling the enterprise to securely manage their mobile workforce.
