

D365 Guides Governance Service

Our value proposition

Out-of-the-box mixed reality solutions typically do not consider the challenges of a regulated life sciences industry.

NNIT help configure, secure and implement governance for your D365 Guides in your organization.

Our life sciences DNA and full stack IT capabilities, combined with a specialized and focused mixed reality team, enable your organization to reap the benefits of D365 Guides.

What we offer

We provide an acknowledged best practice for the creation, approval and archiving of D365 Guides in a regulated environment through our proven governance framework that also includes how to link D365 Guides to QMS systems.

We take your enterprise stakeholders through the following steps for establishing full control of D365 Guides:

1. Analysis
2. Scope & Requirements
3. Setup GxP Governance Framework
4. Conduct PoC
5. Qualify & Go Live
