Modern Work and Collaboration
Modern collaboration and communication services.

Technology is changing not only the way as we do work, but also the way how we think about it. The **Modern Work and Collaboration workshop** is dedicated to all Organizations on the early stage of the digital transformation and all Organizations who plan to deploy modern Microsoft collaboration and communication services to support daily work.

The workshop will help to choose appropriate strategy in the digital transformation and give answer how to develop in the future. During the workshop, participants will learn how to choose proper **Microsoft service**, how to combine it with others and use advantages and disadvantages of particular combinations to make this combination the most effective. For higher-level managers, the workshop will show from the practical side how to manage change and deploy effectively new services using **advanced PROSCI methodology** with **Microsoft**. The Workshop final outcome is to deliver a detailed action plan and recommendations for the Microsoft services usage in the Organization's IT environment.

Five areas

- ❏ **Analysis**
- ❏ **Current state**
- ❏ **Threat identification**
- ❏ **Usage scenarios**
- ❏ **Action plan**

Assess
Gather information on current environment and meeting practices.

Art of the Possible
Showcase practice use of Modern Services

Build the Plan
Build the strategy and roadmap for deployment and adoption

Analysis
Identify key needs and challenges that can be mitigated at the strategic level.

Current state
Review and assess the current state of the organization from a technology and business perspective

Threat identification
Stage of identifying constraints and tipping points for the current environment.

Usage scenarios
The stage presents the most appropriate scenarios for the organization to use each Microsoft services and solution.

Action plan
Based on the analysis, a detailed action plan will be created, along with recommendations.

Choose the best solutions

- ❏ Teams Meetings
- ❏ Teams Phone
- ❏ Viva
- ❏ Adoption & Change Management

- ❏ Power Platform for Teams
- ❏ Teamwork Deployment
- ❏ Endpoint Management
- ❏ Frontline Worker Solutions

How does it look like ?
Modern Work and Collaboration
Modern collaboration and communication services

Introduction
The workshop begins with an introduction and an overview section. This part will discuss the detailed scope and purpose of the workshop.

Analysis of the environment
In this part of the workshop an expert engineer from Integrated Solution will conduct a thorough analysis of the current work environment and prepare an appropriate summary report. Based on this **report,** will prepare detailed **Action Plan** for further steps.

Our commitment:

Our workshops will help you achieve your business goals better and faster than the competition

Demo Modern Work and Collaboration
This part of the workshop will show from the practical side how to connect employees in the organization using modern collaboration services. Based on the demonstration environment, it will show scenarios for the use of individual services and their combinations, to the most similar to the current environment in which the organization is currently operating.

Practical demonstration may cover the scope of several of the following:
- **Teams** - in the areas of Meetings, Phones, and Power Platform applications.
- **Viva** - with Connections, Learning, Topics and Insights modules
- **Adoption & Change Management** - PROSCI methodology in change planning.
- **Frontline Worker Solutions** - solutions for frontline workers.
- **Endpoint Management** - to endpoint management
- **Teamwork Deployment** - group work with Microsoft 365

Defining the strategy
The last stage of the workshop will be defining the **RoadMap** and choose **appropriate strategy** in digital transformation based on current and future needs of the company. The second component of this part of the workshop is an analytical and discovery exercise thanks to which participants will learn how to effectively identify cases and possible scenarios for a successful digital transformation using Microsoft modern services.

The workshop plan can be change and adjusted to the expectations and specifics of the organization's work.

Tangible Benefits / Desired Outcomes

- ❏ The workshops are conducted by an experienced expert from the Microsoft Competence Center at Integrated Solutions.
- ❏ Substantive and practical knowledge is conveyed in an understandable way and adapted to the expectations of the recipient.
- ❏ Workshops are always based on the latest versions of Microsoft products and services.
- ❏ The workshop ends with a summary report and a proposal of an action plan.

Why Integrated Solutions Sp. z o.o ?

We are trusted advisor on a market in digital solutions area. As a experienced Microsoft Partner, we advise our Customers how to develop their businesses even better thanks to digitization and modern technologies. We provide ready-made solutions and provide the highest level of security for deployment.
