

Modern Work and Collaboration Workshop

Modern work services for collaboration.

Modern Work and Collaboration Workshop - this workshop is dedicated to all Customers who need to choose a proper strategy connected with digital transformation especially in the collaboration and communication area - from the scratch to full transformation based on **Microsoft 365 services**. The purpose of this workshop is to reach full alignment between technical requirements, end users and business needs. The final outcome will provide better productivity for Customer's Organization. The Modern Work and Collaboration workshop combines an in-depth analysis of user and workgroup, work profiles, existing dependencies, and utilized services in order to select the most effective **Microsoft 365 solution**. The workshop will also allow participants to learn about new **Microsoft services** and apply them to their daily work. For high-level managers, the workshop will provide practical knowledge in the field of **Adoption and Change Management** in accordance with the advanced **PROSCI** methodology. This Workshop delivers a plan and recommendation that will maximize the company's existing investments while increasing productivity in key areas.

Estimated workshop duration: 6 hours
