

Virtual Desktop Infrastructure

12-Week Implementation

Whether you are ready to move your entire IT infrastructure to the cloud, or you require a hybrid infrastructure combining on-prem and cloud native solutions, there's no denying that moving to the cloud offers many benefits.

The Implementation Process

KTL will configure and implement Office 365, Enterprise Mobility & Security, and Windows 10 Enterprise features in a Virtual Desktop Infrastructure (VDI) in Azure cloud and configure Azure Sentinel services.

Benefits

The Virtual Desktop Infrastructure (VDI) solution utilizes Azure cloud to empower businesses to:

- Achieve improved security and compliance
- Gain enhanced mobility and flexibility
- Streamline IT infrastructure

Reduced IT Costs

- Simplify data management with visibility across your entire virtualized infrastructure.

Modern Work

- Increase remote worker productivity and team collaboration on any device

Robust Security

- Enable secure access to applications and data anywhere, any time.

Deployment and Configurations

- Azure Active Directory Domain
- Azure Virtual Desktops
- Azure Sentinel
- Microsoft Office 365
- Azure Information Protection
- Microsoft Defender for Office

A Virtual Desktop Infrastructure (VDI) saves an organization time, energy and effort resulting in improved employee productivity and reduced organizational costs.
