

# VergeLink: Intelligent cloud connectivity for machine builders.

#IoT #IIoT #Azure #Cloud #Edge

With the VergeLink edge gateway, you can connect PLCs and field devices to Azure or any IT-system in as little as 5 minutes. Reduce your IIoT costs with intelligent edge analytics and automated onboarding.

## Data Acquisition intelligent, scalable & flexible

- ✓ Intelligent edge analysis & pre-processing
- ✓ Fully automated connection to Microsoft Azure
- ✓ Central configuration in the cloud
- ✓ Flexible options in the selection of hardware
- ✓ All relevant industry protocols

### VergeLink Connectivity

- OPC UA
- S7 Protocol
- Modbus TCP
- Modbus RTU
- IFM VSE
- EtherNet/IP
- IO-Link

### Only with VergeLink

- you can perform No Code Edge analyses
- data sources are automatically detected and connected
- you can combine cloud-connectivity with other edge workloads
- you have a solution that is focused only on machine builders
