

DXC Security Monitoring with Azure Sentinel

Cloud Native SIEM / SOAR protection through the power of Microsoft Azure Sentinel.

A cloud-based, managed service for all industries. DXC Security Monitoring accelerates threat detection, automates reporting, promotes compliance, and minimizes the complexity associated with security incident monitoring and management.

Rapidly deployed with zero to minimal infrastructure requirement for multi-cloud, hybrid and on-premise customers.

Enabling the monitoring of security events through rapidly deployed connectors for Microsoft and third-party services.

201%

Azure Sentinel delivers an ROI within 3 Years versus legacy SIEM platforms

<6Mths

Azure Sentinel investment payback is typically less than 6 months

Forrester TEI Report Nov 2020

What we offer

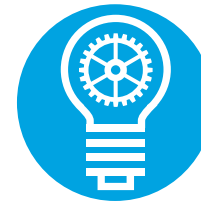

Onboarding log sources

Agreed specified event log sources rapidly onboarded to the DXC Azure Sentinel service

Alerting and Detection

The DXC Azure Sentinel implementation will deliver an initial set of standard, DXC-recommended and agreed detection rules for the customer estate

Analytics and Incident Response

DXC will deliver SOAR responses for detected incidents within Azure Sentinel. Fully automated SOAR drives investigative focus and capacity to higher level incidents

Reporting

The Azure Sentinel platform provides a centralized view of all cyber security incidents on the customer estate

About DXC Technology

DXC Technology (NYSE: DXC) helps global companies run their mission critical systems and operations while modernizing IT, optimizing data architectures, and ensuring security and scalability across public, private and hybrid clouds. With decades of driving innovation, the world’s largest companies trust DXC to deploy the Enterprise Technology Stack to deliver new levels of performance, competitiveness and customer experiences.
