8-Wk implementation of Microsoft Dynamics 365 Business Central, Microsoft's ERP software for financial and business management that will allow you to work smarter and faster

See what customers are saying:

"Arce Clima is now able to monitor and anticipate all financial activities thanks to Dynamics 365 Business Central"

- Carlos López, CEO, Arce Clima

WHAT WE OFFER:

Are you struggling to manage your growing business across finance, sales, service, and operations teams? Over the last decade, the way we work, where work is done, and business models have change exponentially.

Now is the time to move to the cloud and get the right solutions in place to empower your people to deliver more value to your customers-no matter where they are working from. This quick-start guide provides a high-level overview of the capabilities within Microsoft Dynamics 365 Business Central.

Some of the benefits of D365 Business Central are:

- Adapt as your business grows
- Store and transmit data across your systems
- Collaborate in modern workspaces
- Drive supply chain optimization
- Deliver exceptional customer service
- Optimize warehouse management
- Provide optimal manufacturing outputs

Why Dynamics 365?

Modern applications

Modern applications that deliver new experiences and connect with a business' existing systems to allow organizations to digitally transform their way.

Applications that use mixed reality, the ability to take an application that overlays on the reality in front of the user, that guides them through a business process like never before. Connect to information from social networks, mobile devices, and micro-applications to drive intelligence and inform a more effective business process.

Unified data and processes

Unified data and processes that enable business without silos. Centralized data enables disparate groups to work together effectively with a single, trusted view of processes, relationships, and data. Data connectors allow thousands of systems to bring their data to a single network.

Intelligence that delivers

Intelligence that delivers actionable insight. Data in the new world includes social, relationship, and productivity information in addition to insights generated by business systems. The right solution requires a unified approach that allows companies to automatically leverage their data to decide and act in real-time with expanded analytics, predictive algorithms, and automated AI.

An extensible environment

An extensible environment that enables change. The right solution establishes a data, communication, and application environment that makes it easy to evolve and extend existing business operations, while introducing technologies that enable users to create solutions where no solution exists and to expand data analysis.

Transform on your terms with Microsoft Business Applications. Enable people to do their best work. Gain actionable insights. Thrive with solutions expressly built for change. Unlock next.

Key use cases

Sales

Respond to changing business requirements with a flexible platform to rapidly create new solutions and ensure old solutions are never truly finished.

Service

Understand your customers better and respond more quickly by accessing internal and external relationship data.

Finance and operations

Increase your return on investment with Microsoft's agile and efficient cloud solution.

Talent

Extend your virtual team and coordinate faster with a consolidated view of team members, activities, and responsibilities.

Marketing

Gain end-to-end visibility by connecting data from external markets, social, and legacy sources.
