Microsoft 365 Certified

## Save & share efficiently

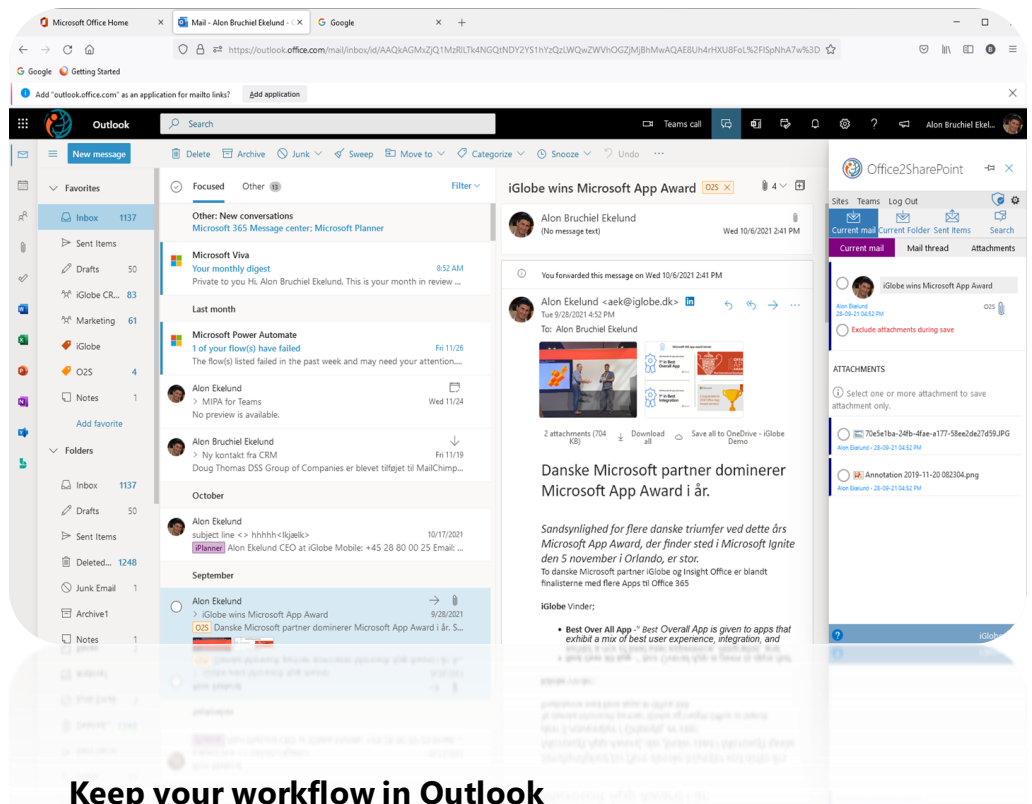

The Office2SharePoint app makes it easy to securely store and share emails creating an easy workflow throughout your workday.

## Search for files

Whether searching from Outlook in SharePoint, Teams, or OneDrive, you can quickly find what you're looking for and insert it into an email as a file or a link.

## Save & Send

The "save and send" feature lets you save emails with attachments back to the same apps. You may choose to save whole email threads or just parts as a PDF.

## Keep your workflow in Outlook

With Office2SharePoint you are keeping your workflow in Outlook. Search for or save files from or to SharePoint, OneDrive or Teams with a few clicks - never leaving Outlook. Office2SharePoint optimizes the modern hybrid workplace.

## Easy deployment. No installation

Easy deployment with no installation required. Deploy the App in Microsoft 365 and have it available on Outlook for Windows, MAC, Web, and Outlook for IOS. The deployment takes the same amount of time for 1 or 100 users.

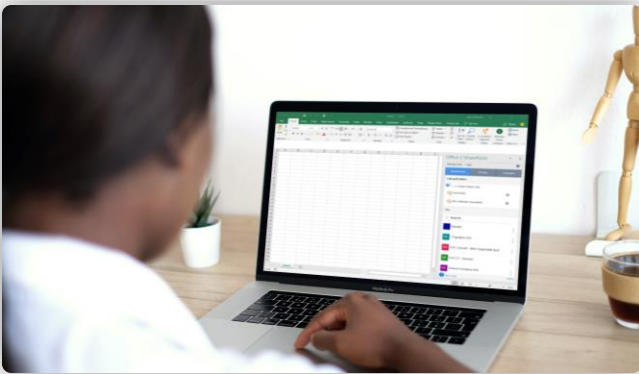

# Office2SharePoint for Outlook and Office

## Easy access to documents at any time

Office2SharePoint brings the content you need to your fingertips so you can complete tasks faster collaborate with others and stay in your flow.

Open, save and edit documents from Office2SharePoint everywhere you are. Manage e-mails when you receive them and stay organized even when on the go. Yes, even save the email as a PDF!

## Enhance the business value of Office 365

Office2SharePoint for Office enhance business value through organizational and individual productivity by making it easy to work with SharePoint and Team Site directly from any Office product.

Office2SharePoint can be used throughout Office 365 - including Word, Excel and PowerPoint.

## Strengthen your team's communication-flow

Break down barriers in communication between team members by having documents and e-mail attachments accessible to all in SharePoint & Teams.
