

Application Security Services

Appsec-Labs LTD

What we provide

We are an expert **APPLICATION SECURITY TESTING & CONSULTING** company.

We provide our customers with top-quality application security testing and consulting services for: Web applications, Mobile Applications, Cloud Applications, IoT & Embedded, Blockchain products and applications.

Meet regulatory requirements

AppSec Labs has helped hundreds of companies improve their product security and receive the desired certification needed to meet **regulatory requirements** such as FDA, HIPAA, PCI, SOC2, ISO 27001 and many more.

The desired product of a penetration testing project is a certification that confirms compliance to industry security standards.

Our Advantage

We offer **a real time Penetration Testing Experience** through our **vulnerability management platform**.

Our system provides advantages such as:

- ✓ Visibility and communication into the penetration testing project
- ✓ Agile delivery of findings
- ✓ Management of security vulnerabilities
- ✓ Unlimited retesting
