

Dynamics 365 Business Central Needs Assessment Workshop

Held in-person or virtually, the Dynamics 365 Business Central Needs Assessment Workshop is a well-structured process to detect the needs of a company. We conduct staff interviews, understand 'AS IS' processes, must-have, and wish to have requirements.

Estimated Cost: \$10,000

We identify the gap between the present functioning and the desired functioning of business aspects. Then we generate a path that connects both. The appropriate detection of the gap between the current and desired functioning leads us to know what the business lacks. The deficiency is cured by directing the resources towards developing and implementing its solutions. When we search for a solution, we precisely identify the finest possible features which are the best suited for your organization to increase efficiency and productivity.

This workshop can be broken down into two 4-hour sessions or multiple day sessions.

What will we learn?

Understand relevant capabilities and build a plan that aligns your business outcomes with your vision.

Who should attend?

Include Finance Director, VP of Finance, executive-level sponsors, managers, and individual contributors.

What happens after?

At the completion of the activity, you receive an overview of workshop findings and recommended next steps.

Included in the D365 Business Central Needs Assessment Workshop will be:

- Financial Assessment
- Requirement and Process Review
- Gap Analysis
- Scoping Assessment

Dedication. Innovation. Results.
