

Copilot for Microsoft 365 Adoption Accelerator

Supporting you on your
journey with Copilot for
Microsoft 365

Copilot for Microsoft 365 Adoption Accelerator overview

Copilot for Microsoft 365 is integrated into Microsoft 365 apps and accesses tenant content and context through Microsoft Graph. It automatically inherits all company's security, compliance, and privacy policies and processes.

Copilot only presents such data that each user can access and uses the same underlying controls for data access as other Microsoft 365 services.

Organizations have responsibility to keep access in control. It's important to follow "just enough access" principle, so that each user can benefit from Copilot but doesn't find resources that aren't meant for them.

Copilot Data assessment helps to identify potential data privacy or security concerns e.g. oversharing and ensures that appropriate measures are in place to protect sensitive information.

Build the plan-meeting

We will arrange a meeting with the customer, in which we will agree on

- User training strategy
- Communication strategy
- A plan for the Champions Community
 - Identify potential champions
 - Decide on the communication channel for champions
- Schedule

- We focus on improving the employee experience by ensuring that users have the skills they need to perform their tasks happily and efficiently
- We take care of the communication about the upcoming learning sessions and the implementation process

Adoption of Microsoft Copilot

Written instructions and guidance on how to get started with Copilot.

Demonstration of the use of Copilot in a two Short Digital Learning Sessions.

Common use case library to support implementation.

Help, advice and problem solving in a joint Q&A site.

Champions

Representative group of 10-20 users who have access and use Copilot before it is released to the general public.

Learn and share

Champions can provide guidance and share best practices across the organization.

Structured program

During the four week-pilot period we will create a communications channel and organize facilitated meetings for the champions to present use cases, discuss challenges, and share useful tips.

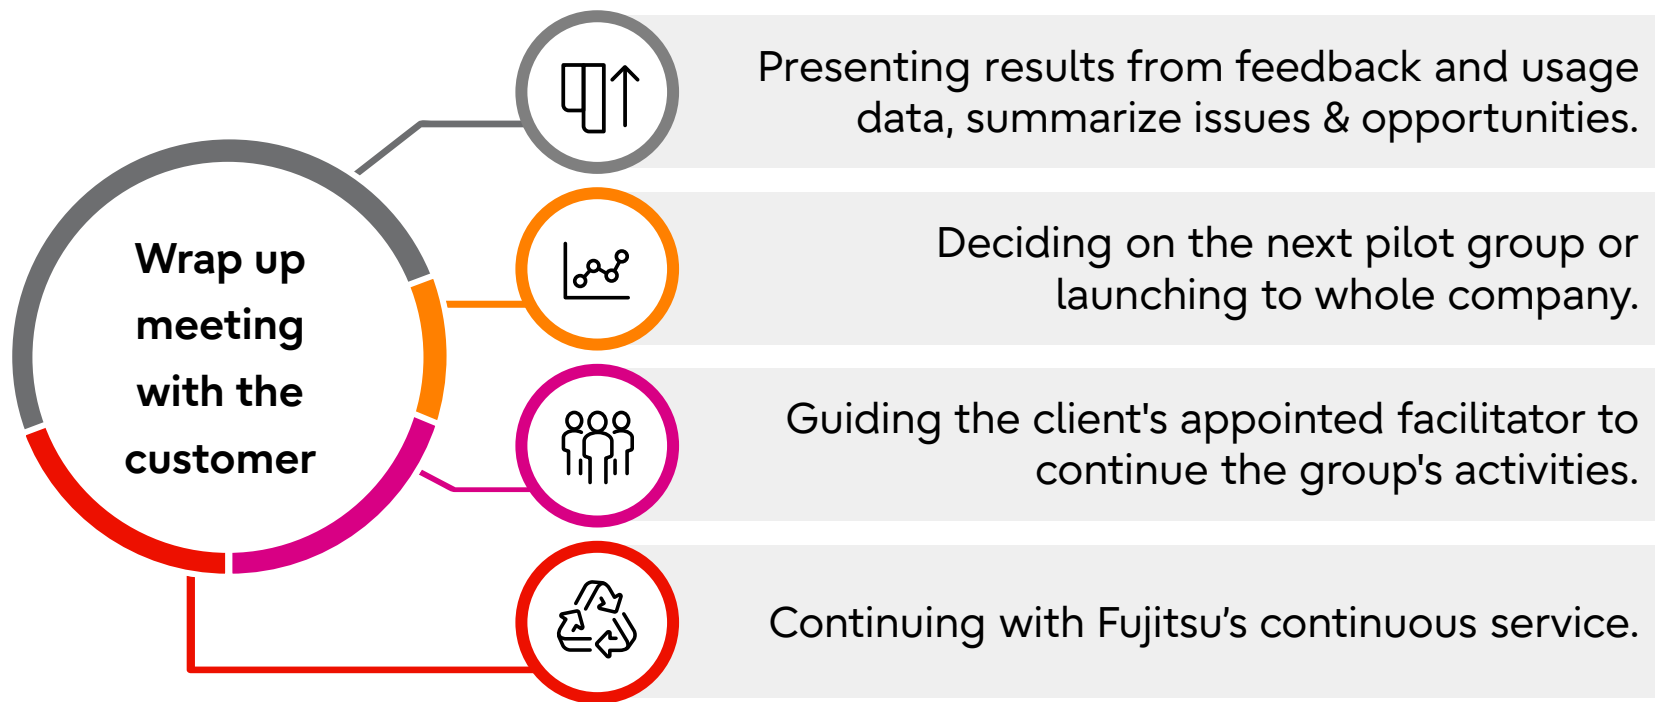

Feedback

Constructive feedback and insights from the Champions will help you prepare for the full-scale launch.

Hands-on learning

- In this 2-3-hour workshop our focus will be on hands-on learning with Copilot.
- Everyone in the pilot will get a chance to participate in one workshop
 - We'll organize workshops for 50 people at a time.

How can Fujitsu help you in your AI journey? **FUJITSU**

Scalability

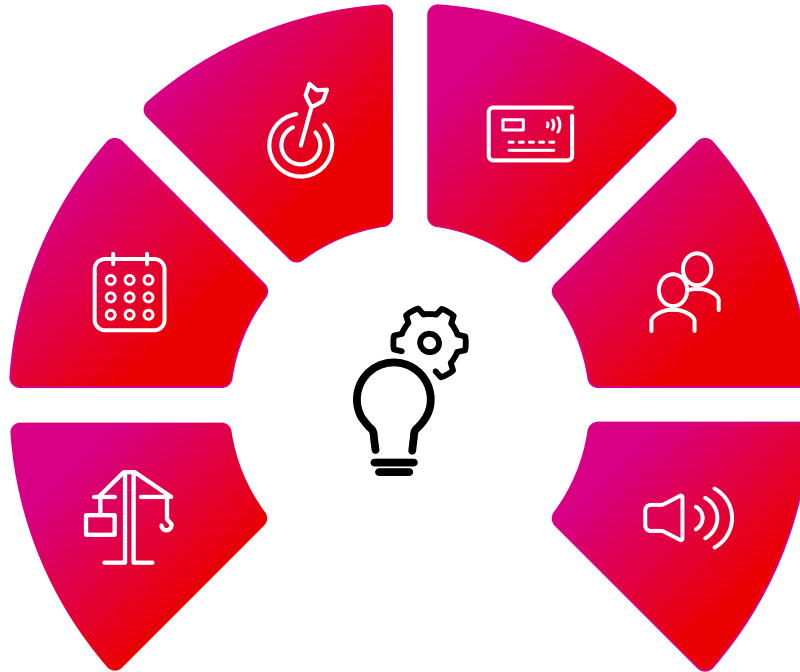

All the way from personal productivity to your business processes

Customer case
