WHAT YOU GET WITH
OMNIANALYTICS™ D365 BC

Next Gen Analytics and Reporting

Get the reporting and insights you need, when you need them. We save users from the challenge of navigating complex ERP data, providing easy, reliable, ready-to-use models that break down silos and bring together data from all your organization's functional areas.

Immediate Insights, Commitment to Your Success

From installation to go live in as little as a day, you can quickly turn data into real-time intelligence with 100% remote deployment and service. That means you get help when you need it. We are fully committed to your ongoing success.

Visualize your data how you want

With OmniAnalytics™ D365 BC powerful dashboards, you can empower your entire team with data insights in real-time. You decide, using Microsoft technology, how to govern and access the information. Our Azure-based open framework allows for customization using your unique additional data sources.

The Benefits of OmniAnalytics™

- Integrated Power BI ERP solution
- Lowest cloud operating costs
- Fastest response
- Most agile scalability
- Lowest technology risk
- Full integration with other Microsoft products
- Self-sufficient analytics
- Microsoft-certified training
- Microsoft Fabric-ready Framework

- Easy dashboard customization
- End-to-end view of your business
- Lifecycle support
- Readily scalable
- Standardized operations
- Fastest time to insight
- Open data architecture
- Simplifies Data Migration
- AI ready for your unique applications

OmniData Provides High-Quality Microsoft Certified Training

In addition to pre-configured reports and dashboards built on familiar Microsoft applications like PowerBI and Excel, OmniData also provides high-quality, Microsoft-Certified Training to ensure your teams can take ownership of your reporting. We focus not just on deploying a solution, but making sure it's delivering value across your entire organization. Let us show you how **OmniAnalytics™ D365** can help you.
