# RSM's Enterprise Asset Management for Manufacturing

Know the true costs of maintaining your facilities and move from reactive to proactive maintenance.

RSM, the leading middle market consulting, tax, and audit firm's 16,000 employees focus on solving manufacturing businesses' complex problems using extensive market research and technology. If you are presently performing maintenance using a 3rd party software or a paper system, you are not truly realizing the benefits of Enterprise Asset Management as related to D365.

## Efficient delivery

*Standardized processes with help content (click by click and business process flows) for each standard process included. Data loading templates will ensure that your data is loaded efficiently. All of this means that your valuable time will be spent adding value to your maintenance organization rather than designing a system.*

## WHAT WE OFFER

RSM's Rapid Implementation for Asset Management uses proven implementation strategy along with standardized maintenance processes. These are the 4 offerings:

- Level 1 - Allows users to manage functional locations and complex assets while storing information and documentation about them. (4 Weeks)
- Level 2 – Level 1 functionality with additional Work Order capabilities, additional asset and functional location data using Attributes. (6 Weeks)
- Level 3 – Level 2 functionality along with the introduction of Warranties, Fault Management, and using Asset Priorities in conjunction with Work Orders for scheduling. (8 Weeks)
- Level 4 - Level 3 functionality along with additional Work Order, Fixed Asset and Production Resource Integration. Work Orders will consume inventory items, services along with labor. Asset Spare Parts will be built along with Forecasting Items and Hours for Work Order planning. IoT offerings will also be introduced. Mobile device and reporting to support level 4 functionality. (10 Weeks)

# Why Dynamics 365?

## Modern applications

Modern applications that deliver new experiences and connect with a business' existing systems to allow organizations to digitally transform their way. Applications that use mixed reality, the ability to take an application that overlays on the reality in front of the user, that guides them through a business process like never before. Connect to information from social networks, mobile devices, and micro-applications to drive intelligence and inform a more effective business process.

## Unified data and processes

Unified data and processes that enable business without silos. Centralized data enables disparate groups to work together effectively with a single, trusted view of processes, relationships, and data. Data connectors allow thousands of systems to bring their data to a single network.

## Intelligence that delivers

Intelligence that delivers actionable insight. Data in the new world includes social, relationship, and productivity information in addition to insights generated by business systems. The right solution requires a unified approach that allows companies to automatically leverage their data to decide and act in real-time with expanded analytics, predictive algorithms, and automated AI.

## An extensible environment

An extensible environment that enables change. The right solution establishes a data, communication, and application environment that makes it easy to evolve and extend existing business operations, while introducing technologies that enable users to create solutions where no solution exists and to expand data analysis.

Transform on your terms with Microsoft Business Applications. Enable people to do their best work. Gain actionable insights. Thrive with solutions expressly built for change. Unlock next.

## Key use cases

### Sales

Respond to changing business requirements with a flexible platform to rapidly create new solutions and ensure old solutions are never truly finished.

### Service

Understand your customers better and respond more quickly by accessing internal and external relationship data.

### Finance and operations

Increase your return on investment with Microsoft's agile and efficient cloud solution.

### Talent

Extend your virtual team and coordinate faster with a consolidated view of team members, activities, and responsibilities.

### Marketing

Gain end-to-end visibility by connecting data from external markets, social, and legacy sources.
