

Quantum-CSP- marketplace development tool

Discover, distribute, provision and consume services
simple and fast.

With reporting and billing automation implemented within Q-CSP, we do not have to worry about any possible losses and about our more than needed transparency.

The Quantum CSP Automation Platform is a Solution Provider business / marketplace development tool that aims to provide customers with a complex suite of combined solutions with an on-demand service offering based on the monthly or annual payment pattern or integral / in advance payment.

Why customers use Quantum-CSP

- Cover all internal tasks as a Service Provider
- Simplify daily internal processes
- Keep full control of your business while building recurrent revenue

Improved scalability

- Sustained performance
- Better transaction throughput
- Full control of deployment

Eliminate possible loses and have full transparency

Easy user interface

- Access to the platform anytime, anywhere
- Transparency and cost optimization
- Keep operational efficiency

Streamlined and well documented ordering process

Hundreds of resellers onboarded

- 98% uptime in CLOUD
- Internal resources/people shifted to other projects due automation
- 45% transparency increase

20% ROI in less than a year

Now we rely on Q-CSP with over 200 resellers onboarded, working and transacting our software solutions (based on subscription or perpetual) available in Q-CSP. Our resellers are traditional resellers, VAR's, MSP's, ISV's and soon we will cover new channels that will help our growth goals.
