

Microsoft Cloud for Financial Services (MC4FS) and Azure OpenAI

TCS Offerings for Microsoft Cloud for Financial Services (MC4FS) and Azure OpenAI

1

Assessment and Advisory Services

- TCS provides a thorough assessment of the customer's current systems, identifying opportunities for cost savings and productivity improvements.
- TCS offers comprehensive advisory services to help customers smoothly transition to MC4FS, optimizing the benefits of the cloud.

2

Strategy, Recommendation, and Roadmap

- TCS helps to develop strategic plan tailored to each customer's unique needs and objectives.
- TCS provides specific recommendations and clear roadmap to ensure successful transition to MC4FS and seamless integration with Azure OpenAI.

3

Bespoke Implementation

- The implementation process considers critical factors such as Data Model & Insights, and Governance and Compliance.
- TCS ensures that each solution is custom-built to suite the customer's specific needs, ensuring maximum efficiency and compliance.

4

Data Ingestion and Migration

- This involves integrating the source system and migrating data to the new platform.
- TCS ensures that this process is efficient, secure, and minimizes disruptions to the customer's operations.
 - **Source System Integration:** TCS integrates the customer's existing systems with MC4FS, ensuring seamless data flow and functionality.
 - **Data Migration:** TCS manages the migration of data from the customer's existing systems to MC4FS, guaranteeing data integrity and security throughout the process.

5

Compliance, Privacy, and Security

- With MC4FS and Azure OpenAI, customers can be rest assured of stringent compliance, privacy, and security measures.
- TCS ensures that the solution adheres to relevant regulatory standards, while also prioritizing data privacy and system security.

MC4FS- TCS Advisory, Purpose-Driven Implementation & Integration Services
