LLumin CMMS+

CONDITION-BASED MONITORING

Imagine achieving unparalleled production capabilities without the fear of unplanned downtime.

WITH LLUMIN, IT'S NOT JUST POSSIBLE— IT'S YOUR NEW REALITY.

Advanced analytics paired with just-in-time maintenance empower you to extend asset lifecycles, eliminate unexpected outages, and drive down operational costs.

Real-time machine condition monitoring

Trigger notifications and follow-up

Advanced analytics

Ensure team collaboration and workflow

Right actions at the right time

Why Just-in-time Over Date-based Maintenance?

Break the cycle of date-based maintenance, which often leads to over-maintaining or under-maintaining your assets.

LLumin's software puts you in the driver's seat for machine maintenance, ramping up efficiency and ensuring every dollar is well spent.

"We monitor machine data of our equipment and use preset rules to identify out-of-spec conditions and then trigger actions with LLumin CMMS+."

-Engineering Manager, Red Cedar Natural Gas Gathering
