CitiusTech

CitiusTech GenAI Physician Assistant

To ensure every patient gets the right treatment, it is critical for physicians to have the latest summary of their clinical observations, notes, medications etc. at their fingertips. CitiusTech's 'GenAI Physician Assistant' transforms all this unstructured & structured data into a real-time accessible knowledge base to drive engagements, make informed decisions and increase operational efficiencies.

Physician Value proposition

- **Document Summarization:** Quickly get a summary of the patient's history by condensing comprehensive medical texts into concise, easy-to-digest versions, ensuring physicians grasp the essential information in no time

- **Intelligent Search:** Quickly find relevant research articles, blogs, and theses from the provider's internal systems, saving valuable time

- **Personalized Outreach Content:** Generate custom referral letters, brochures, and emails for patients thereby empowering physicians to engage them with compelling content

Patient Value proposition

- **Conversational Bot:** Patients are able to ask questions relating to their medical condition, treatment, etc. and receive contextual answers even when their physician is unavailable
