# GenAI-Powered Clinical Advisor

A cloud-native GenAI solution transforms your existing clinical document knowledge base into a GenAI-Powered Clinical Advisor. This upgrade enables clinicians to swiftly access relevant documents and summaries, and offers them valuable advice based on trusted data sources.

- Improve healthcare outcomes across your organization by facilitating easier access to library documents, thereby **enhancing efficiency**.

- Introduce advanced search functionalities that enable clinicians to **find both explicit and implicit information effectively**.

- Provide concise summaries of documents, allowing clinicians to rapidly grasp essential information and **devote more time to patient care**.

- Customize responses to meet the specific requirements of healthcare specialists, thereby aiding them in making **more accurate decisions**.

**Cloud Native & AI Labs**
HCLTech

Microsoft Azure

OpenAI

## Solution Highlight

- Utilize advanced Retrieval Augmented Generation techniques to **improve the outcomes of similarity searches**

- Develop prompts for healthcare specialists, such as cardiologists and diabetologists, to **improve the detail and quality of the responses**.
