

Dynamics 365 **Confirming**

Generate the Confirming file from Dynamics 365 Finance **complying with all the informational requirements** of the banking entities.

Easily manage supplier payments

Configure the system so that Dynamics 365 Finance can generate Confirming, **facilitating financing** and strengthening the mutual business relationship between your business and your suppliers.

Do not suffer tensions in treasury

Offer your suppliers the possibility of **charging earlier to have liquidity** before the expiration of your invoices through a financial company that will be in charge of managing these payments.

Avoid the risk of defaults

Through the confirming mode without resources, **the collection of your invoices will be insured**, and the risk of non-payment will fall on the financial institution or bank that manages the payments.
