

The Future of Digital Workplace with Generative AI

Of enterprises will have used generative AI API models and/or deployed GenAI-enabled applications in production environment, by 2026.1

Of high maturity digital workplaces will have leaders with a background in Al, data and analytics, versus infrastructure and operations.²

Of conversational Al offerings will be embedded with GenAl, by 2025.3

Microsoft's Copilot products impact not only digital workplace technologies but also multiple enterprise application areas. Digital workplace application leaders must be the focal point to evaluate, coordinate and prioritize all Copilot investments as part of a broader generative AI strategy.²
