## Plan and Deploy Microsoft Endpoint Manager

# Microsoft Endpoint Manager

### Deployment Engagement

This engagement is designed to prepare and deploy Microsoft Endpoint Management in a Customer's production environment.
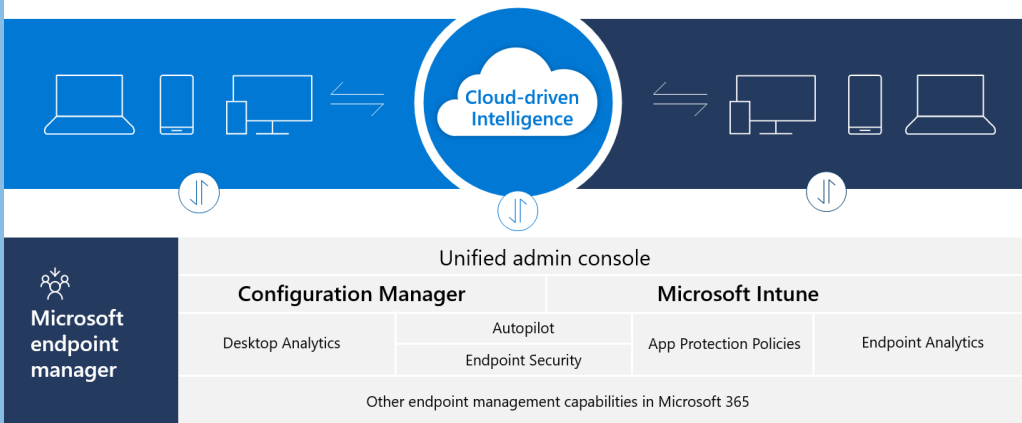

Services include an initial discovery and planning workshop with Customer stakeholders, services for implementing the deployment plan for pilot devices, and knowledge transfer with the Customers IT team throughout the engagement.

## Example Objectives Include:

- Modern Management of Windows 10/11 devices
- Windows AutoPilot Deployment for User driven provisioning
- Mobile Device Management (Android, iOS)
- Zero Touch Deployment of Mobile Devices

- macOS/iPadOS Device Management
- Tenant Attach/Co-Management of existing Microsoft Endpoint Configuration Manager environment
- Device compliance implementation
- Mobile Application Management for BYOD

### Microsoft Endpoint Manager

A cloud-enabled transformative platform for unified and secure endpoint management

Cloud-driven Intelligence

**Microsoft endpoint manager**

Unified admin console

| Configuration Manager | | Microsoft Intune | |
|---|---|---|---|
| Desktop Analytics | Autopilot | App Protection Policies | Endpoint Analytics |
| | Endpoint Security | | |
| Other endpoint management capabilities in Microsoft 365 | | | |
