1-Day workshop to understand and prepare for Microsoft Security Copilot

Covenant TECHNOLOGY PARTNERS

AI powered apps deliver valuable insights and increase productivity, however, they also potentially expose a significant amount of new data regarding your activities and content. This module conducts educational & discovery sessions as well as how to protect data exposure to Copilot with Microsoft Purview.

Price: $4,800 or $200/hour | 24-hour Engagement

Topics:

Introduction to Microsoft 365 Administrative portals: https://compliance.microsoft.com/

Licensing Considerations & Practices

Understanding Copilot's data access privileges

Discover privacy and regulatory risks

Identify regulatory/industry compliance standards

Deliverables:

- Data Risk Check - During the Data Risk Check we seek to surface hidden privacy and regulatory risks related to existing data within the clients organization.
  - Data Risk Check leverages Microsoft 365 tools and services in an automated process that will discover data that is stored in the Microsoft 365 Tenant and analyze it for artifacts that may impose a privacy and regulatory risk to the organization.
- Analysis and Reports - Comprehensive reports of data that may be exposed by Copilot

Dedication. Innovation. Results.
