Industry Challenge

Overall Equipment Effectiveness (OEE) is at the heart of operational process improvement. It is closely linked to labor costs, production scheduling and capacity management. Already low OEE levels may drop even further due to installation of serialization & aggregation equipment, requiring proactive management.

What you get?

Cloud-based solution: Low cost, highly scalable & no infrastructure to maintain

IoT Technology: IoT enabled wireless sensors & non-intrusive installation with remote monitoring

Advanced Analytics: ability to scale capabilities, e.g. planning, predictive maintenance & performance benchmarks

Pharma-focus & Expertise: Life-long partnership with SCW, a proven advisor to pharmaceutical manufacturer clients

Quick setup & Risk-free: 1-day implementation, 60-day "risk-free" trial with full support to ensure client satisfaction

How does it work?

Supply Chain Wizard installs OEE Tracker in 1 day at client site

Line operators track each activity / task with only 2 clicks or touch

Real-time data is collected across sites/lines and displayed in dashboards

Automated alerts, reports & warnings help improve efficiency & compliance

Why you need it?

Understand your baseline line efficiency before and after serialization

Find ways to **minimize OEE losses** or even improve OEE over baseline

Establish a **performance driven culture** in packaging operations

Enable **data driven decision making** for capital investments & process change

Supply Chain Wizard – Digital Transformation Journey

Digital Factory Journey

Track & Trace Compliance

Impact to the Factory:

- Reduced OEE
- Reduced Throughput
- Higher Maintenance
- More Rejects
- Higher Overtime
- Higher COGS

DATA

- Quality Events
- Line Performance
- Activity Data
- Maintenance Data
- Labor Data
- Environmental Data
- Financial Data

DASHBOARD

- OEE / Performance
- Labor / Asset Analysis
- Capacity / Utilization
- Cost of Goods Sold

OEE
TRACKER

LABOR
TRACKER

DECISIONS

Scheduling:

- Line / Staff Scheduler

Planning:

- Demand / Capacity / Inventory / Supply

Maintenance:

- Planned / Predictive
- Asset Replacement

OEE Tracker Results

Serialization Implementation Improves Par Pharma's Efficiency

Par Pharmaceuticals benefits by employing analytics-based OEE tracking system that digitizes formerly manual data collection processes on multiple packaging lines.

OEE & LINE VIEW DASHBOARD

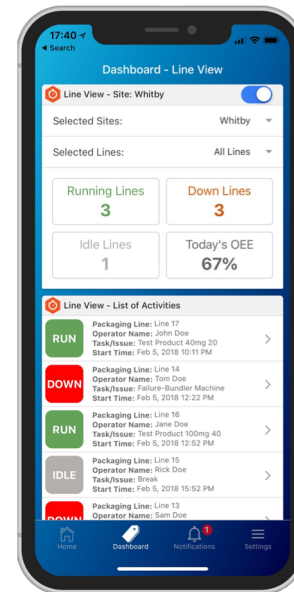

Digital Factory - Transformation Essentials

Operations, OEE & Cost Management

- Efficiency management at packaging lines
- Improve OEE Management Systems & Processes
- Recover lost OEE & improve COGS

Cloud & Mobile

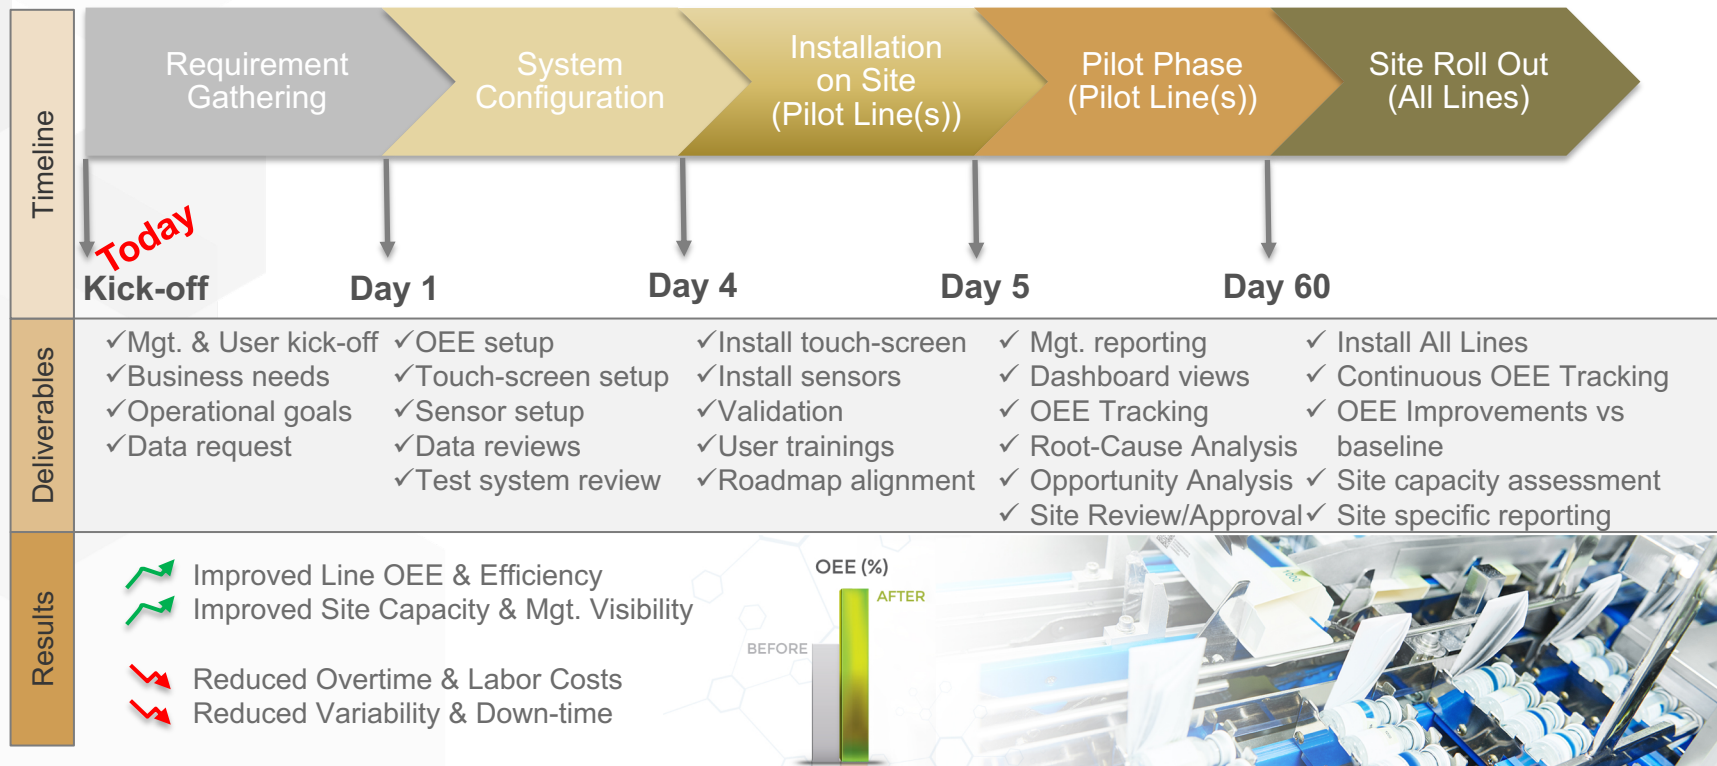

Track 24/7,
wherever you are

OEE Tracker - Pilot Roadmap

Scope: Successful implementation of OEE Tracker and monitoring & improving OEE
