

# The Intelligent Planning Platform

Plan smarter. Drives outcomes. Lead transformation.

The world's data is doubling every two years. By 2025, it is expected to double every 15 hours. This wealth of information has the potential to change the future of business, yet 70% of it sits stored and unused by enterprises worldwide.

On top of this, seemingly never-ending market disruptions have made it challenging for organizations to make smart decisions and plan for an uncertain tomorrow. This is compounded by slow, error-prone, opaque planning processes and systems that lack the ability to provide crucial insights for decision-making.

Planning is being put to the test. The time has come for a new solution that empowers people to plan smarter, drive outcomes, and lead transformation.

Say *Hello!* to Board - The Intelligent Planning Platform.

Smarter planning, actionable insights, better outcomes.

Dynamic what-if scenario planning

Real-time single source of truth

Explainable predictions

Continuous alignment
