

SSDI — Sustainable Software Defined Infrastructure

A joint initiative between Wipro-Bentley-Mapped to decarbonize the corporate and commercial real-estate sector

Priorities by Industry

	Office Space	Retail Stores	Malls	Industrial
<i>Regulatory Reporting</i>				
<i>Energy Efficient Space</i>				
<i>Optimal Space Utilization</i>				
<i>Real Estate-as-a-service</i>				
<i>Virtual Fashioning</i>				
<i>System Interoperability</i>				

Needs of an Owner/ Manager

The existing Gap

Building Manager

Want to identify opportunities to improve operational efficiency and tenant experience

Situational Awareness

lack of a cross functional view across systems

System Intelligence

legacy systems lacking advanced analytics

System Inflexibility

extending existing systems for new apps

Building Owners

Want to modernize their building portfolio to take advantage of new market dynamics

Data Access

multiple systems with different access policies

Scale and Standardization

heterogeneous nature of building systems

Cyber Security

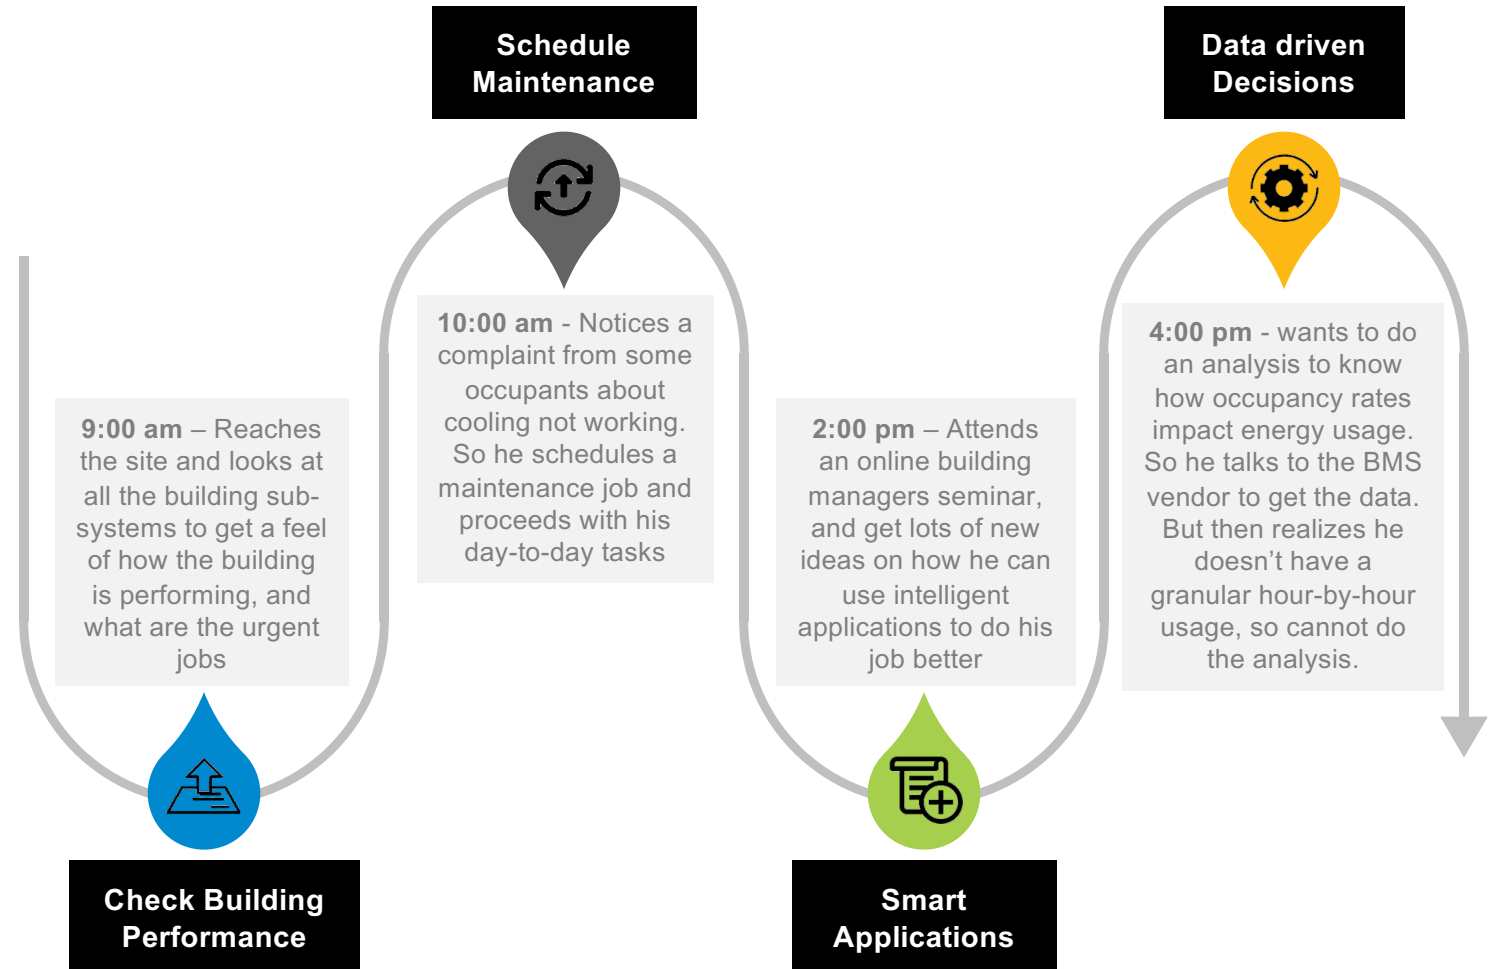

multiple legacy technology
limited security controls

A representative Building Manager's journey

John Doe is a Building Manager and has the difficult job of balancing Occupant Experience with Operational Expenditure and Sustainability Metrics.

The Solution Construct

We give you a cognitive platform to track, analyze, optimize and lay the foundation for next generation infra-as-a-service

A Unified Data Fabric

unifies IT, engineering and operational information and provides open APIs on top of it for future flexibility

Automated Regulatory Reporting

simplifies the process of reporting embodied and operational carbon associated with the building construction and its operations

Smart Applications

uses artificial intelligence to recommend actions which drive operational excellence and tenant experience

Cognitive Interface

to provide a spatial context to building spaces and operation with BIM models

Dashboards Operational Data

4D Value
15.40

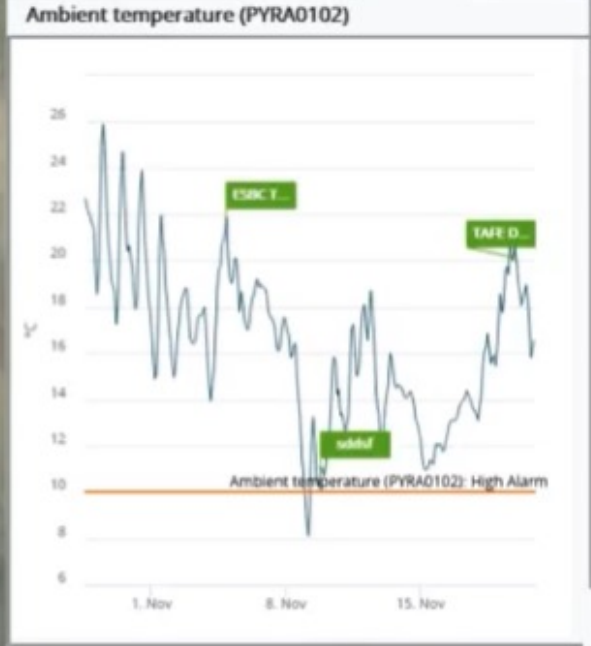

4D Value
97.60

Tree View IoT Devices

Name	Status	TimeTag	Value
Ambient temp	High Alarm	2021-11-20 23:15	15.4°C
Solar radiator	OK	2021-11-20 19:00	0w/m²
Environment t	High Alarm	2021-11-20 19:00	97.6%
Module tempe	OK	2021-11-20 19:00	5.8°C
Solar radiator	OK	2021-11-20 19:00	0w/m²
Ambient temp	OK	2021-11-20 19:00	6.6°C
Wind velocity (OK	2021-11-20 19:00	1.9m/s
Module tempe	OK	2021-11-20 19:00	4.3°C
Battery charge	OK	2021-11-20 20:00	19%
Battery voltage	OK	2021-11-20 20:00	28.5V
Solar PV 14 Co	OK	2021-12-13 17:00	0none

Properties Attributes Data History Data Trend

Smart Applications (Corporate & Commercial Real Estate)

Whole Life Carbon Emissions Management

Embodied and Operational Carbon Emissions Management through performance reporting and Green Certifications – LEED, BREEAM, ISO 50001

Energy Optimization

Optimizes energy consumption in real-time across building spaces and equipment through anomaly detection and building/ HVAC simulations

Lean Waste & Water Management

Optimizes resource consumption through waste minimization, water consumption, water leakage, etc. with data from IOT devices and sensors

Space/ Layout Optimizer

Manages and improves space utilization and occupancy with data from IOT devices and sensors

Equipment Performance Optimizer

Create predictive and condition based maintenance schedules with AI/ Machine Learning

Performance Cockpit

Visualizes building performance in Cognitive Dashboards with KPIs

Sustainability KPIs](#)

We differentiate with speed, scale, and innovation

Speed

1

Hit the ground running and start monitoring building performance across the portfolio in **less than a week**

Scale

2

Capitalize on **global delivery capacity** across 100+ countries

Flexibility

3

Future Safe with **flexibility to build new apps** and intelligence with Open APIs or onboard new partner solutions

Best-of-the-breed ecosystem

4

Three is greater than One. Leverage the power of Wipro-Bentley-Mapped to transform your Building Portfolio

Zero-trust Security

6

Neutralize cyber-security risks with advanced security controls

State-of-the-art Technology

5

Proven tech platforms with a modular and secure architecture that provides control and data ownership to customers

The Ecosystem Construct

Mapped

[Mapped | Data infrastructure for IoT, powering the API economy](#)

- Data infrastructure for Commercial and Industrial IoT
- Simple, seamless, and secure data accessibility

Bentley

[iTwIn Platform \(bentley.com\)](http://iTwIn.Platform(bentley.com))

- Seamless Access to Engineering Data
- Cognitive 3D Visualization and Simulations

Wipro

- Smart/ Green app development
- Data Analytics and AI

Microsoft Azure

- Hyper-scalar Infrastructure

Bolt-on Partners

- IBM (Tririga & Maximo)
- Here Maps (Indoor Navigation)
- ENTRNCE (Energy Transparency)

Customer Benefits

LOWER OPEX

On-demand rollout of real-time smart apps to drive operational excellence with granular visibility & actionable insights

SUSTAINABLE OPERATIONS

Reduce the emissions from property operations and contribute to organizational sustainability goals

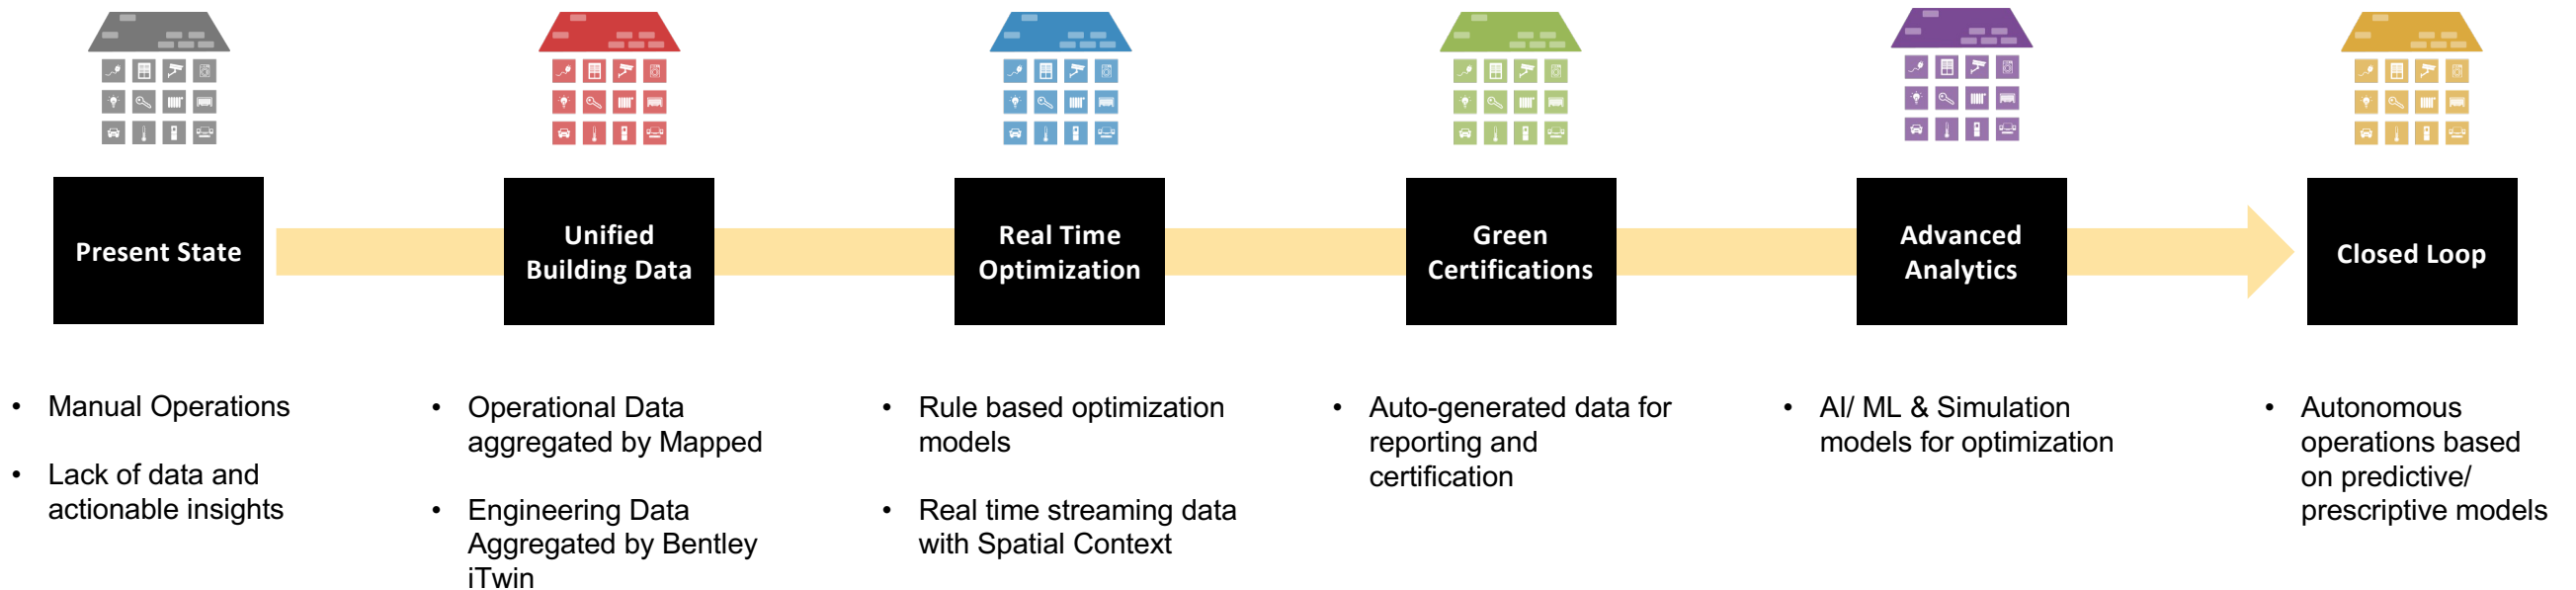

FUTURE PROOF SOLUTIONS

A flexible infrastructure to drive future enhancements and development of smarter applications

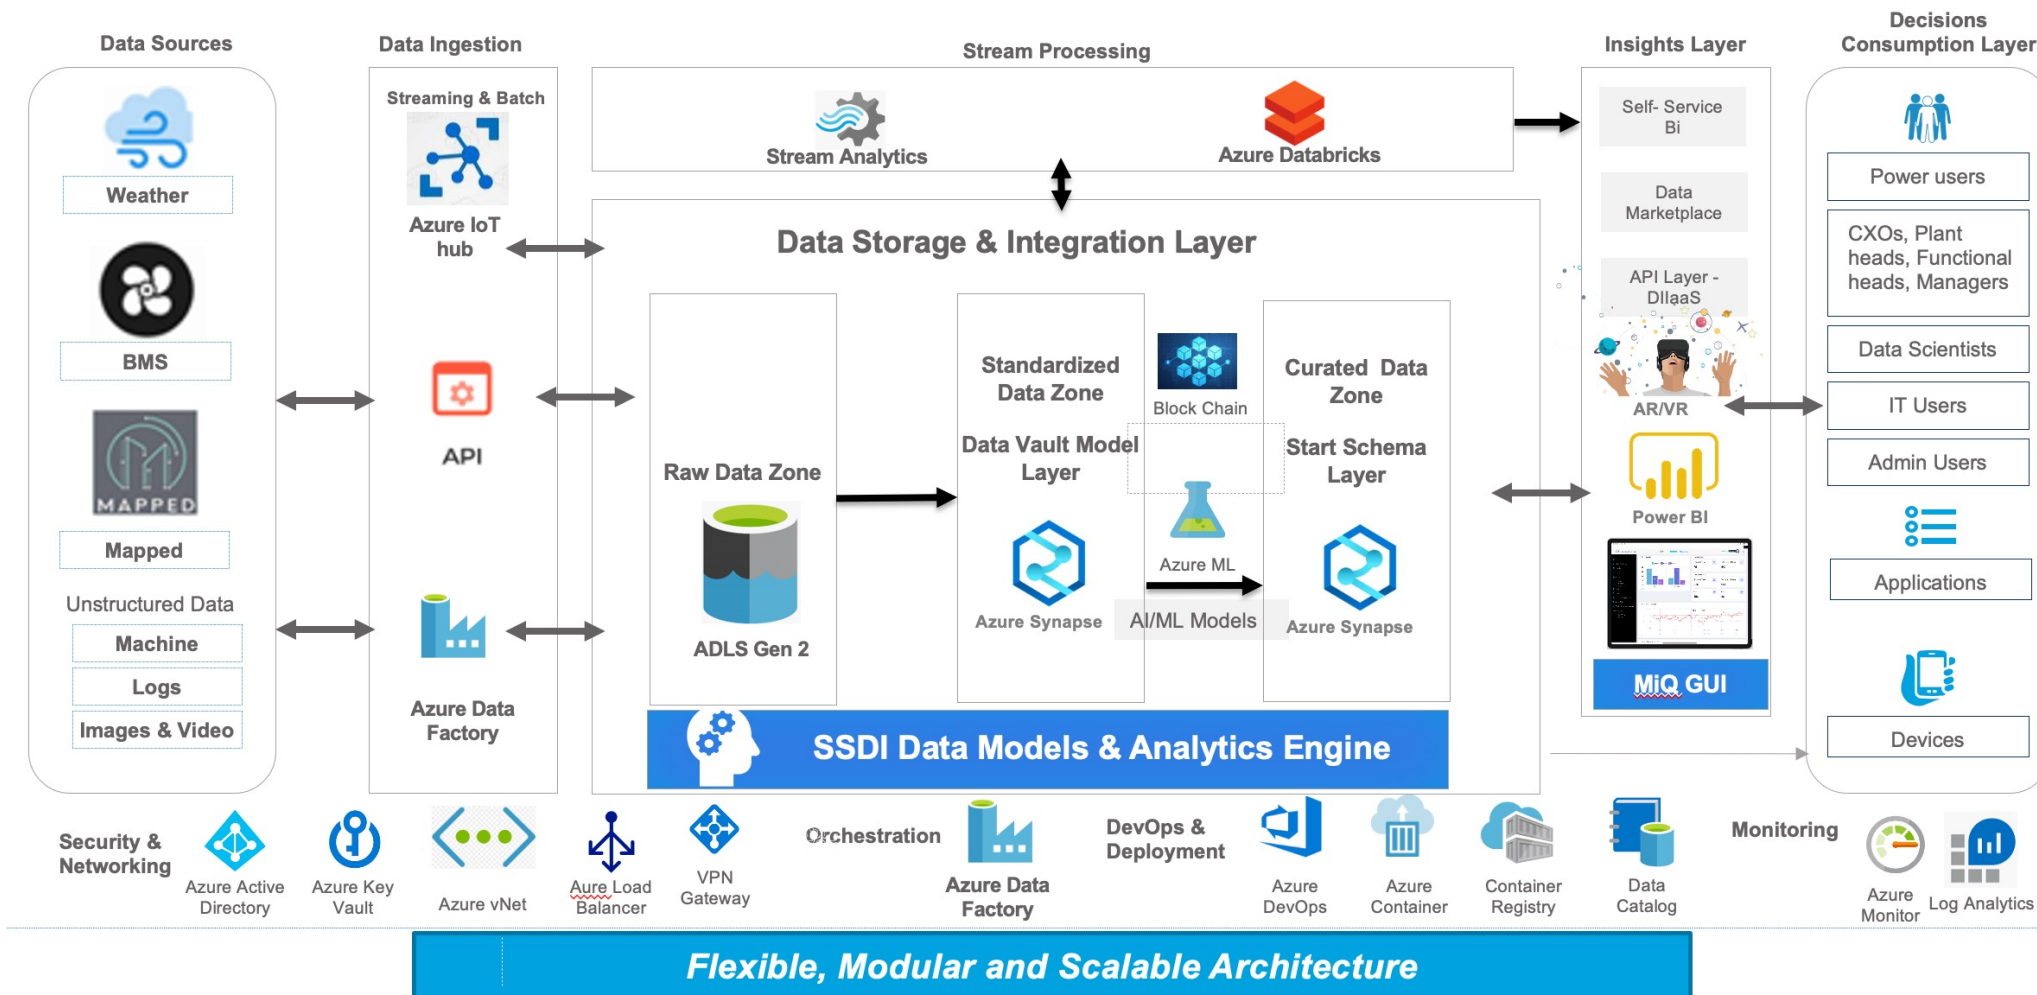

Phases of SSDI Journey

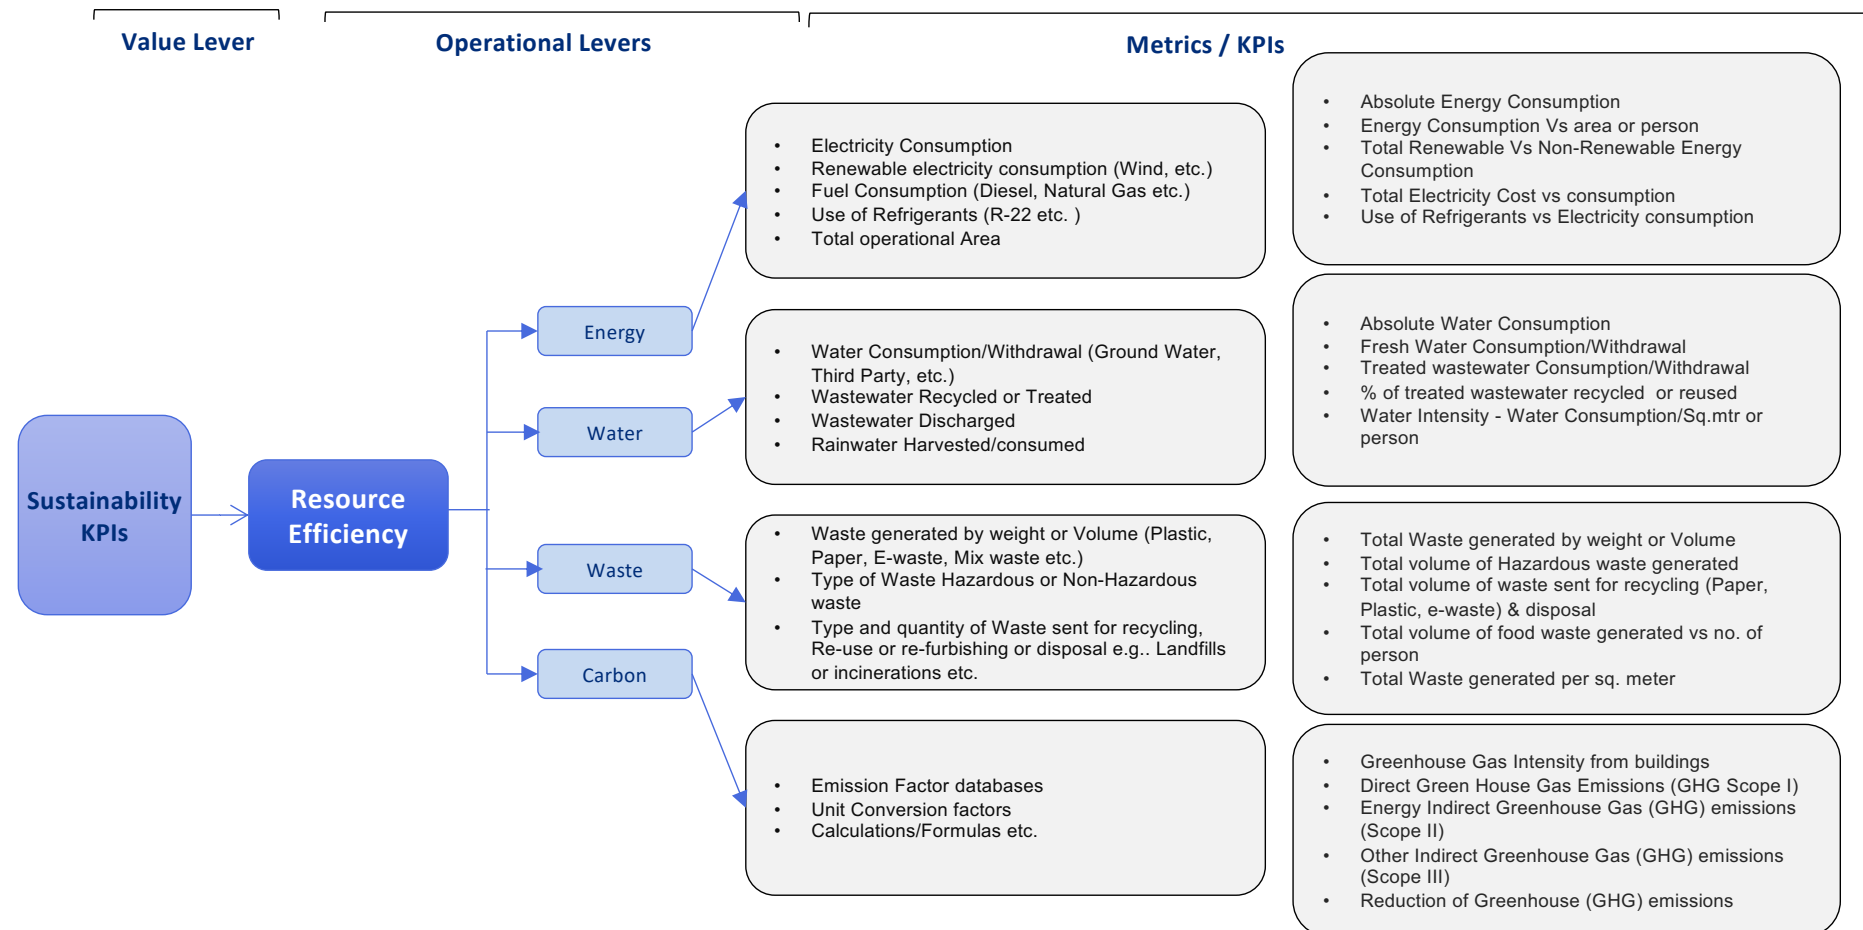

Solution Architecture

Integrated Mapped Data Infrastructure, Azure PaaS

SSDI Sustainability KPIs
