

# CiscAPE

## Harness the power of GenAI to boost customer engagement and increase employee productivity

CiscAPE is a Generative AI publishing platform that dynamically transforms your company's knowledge ecosystem into a multimodal, conversational experience. By converting static information into interactive content, CiscAPE unlocks knowledge silos, making expertise accessible and engaging to employees, customers and any other stakeholders.

- **Enterprise-ready solution**
- **No engineering resources required**
- **Multi-modal content presentation options**
- **Ingest your website, podcasts, videos and docs**
- **Performance, predictability and alignment with built-in CogCache integration**

### Personalized Experiences

CiscAPE transforms your existing static repository of knowledge into a generative experience that adapts to your audience's persona, ensuring your digital presence is as dynamic and versatile as your audience itself.

### Multimodal Transformation

Engage your audience with the power of Generative AI by transforming your simple existing content to personalized presentations, podcasts and more. CiscAPE empowers your users to access and consume your content in their preferred medium.

### Speed, Predictability & Alignment

CogCache, our Cognitive Cache provides performance and cost reductions for your LLM operations while enabling you to maintain absolute control, oversight, and transparency over your AI-generated content.

### Increase Productivity

CiscAPE helps streamline workflows and automate routine tasks with generative AI experiences, allowing users to focus on higher-value activities and significantly increase overall productivity.

### Private and Secure

Securely store your audience data and content with CiscAPE, ensuring only your team has access. Your dedicated CiscAPE instance is exclusively for your use, never shared or used for other purposes, providing a private and reliable foundation as you explore the potential of generative AI.

### Consolidated Administration

From ingestion to publishing, CiscAPE integrates all aspects of content generation, monitoring, user tracking, permissions management, audit trails & compliance seamlessly into one powerful solution. Exposing an API for your developers as well for full control and peace of mind.
