

Automate Your Virtual Appointments with Microsoft Teams Premium

About Magenium

We are a Microsoft-certified Cloud Solutions partner with designations for Modern Work and Advanced Specializations in both Meetings and Meeting Rooms for Microsoft Teams as well as Calling for Microsoft Teams. In addition to our Microsoft Teams skillset, we have even built out a broadcast studio in our office utilizing Teams Premium for webinars.

About This Workshop

Deliver better appointment-setting experiences for your customers with our one-day workshop and training session. In this engagement, our Teams Premium experts will help you create an automated way to help you manage your customer-facing appointments.

We'll help you develop a custom-branded, on-demand scheduling system where your customers can find windows of availability that you configure to provide better customer service without cutting into your other valuable activities.

Once active, we will provide light end-user training to get you up and running.
