

**ioTORQ EMIS** integrates multiple data sources, real-time dashboards and AI-driven analytics to manage performance, engage stakeholders and drive performance gains.

**Why use ioTORQ** Maximize cost savings, avoid losses, reduce risk and improve environmental compliance with our Microsoft Azure hosted cloud solution.

## Applications

### Energy & Resource Management

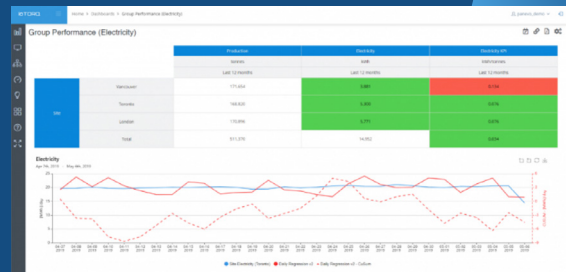

Maximize savings potential with flexible dashboards, advanced target setting, automated alerting & action tracking tools.

### Utility Bill Management

Enhance utility procurement with automated bill processing, error checking and rate optimization.

### Corporate Sustainability Reporting

Monitor emissions, manage waste, ensure compliance and generate auditable carbon emissions reports.

## ioTORQ Statistics

- ✓ Hosting **10Bn** data points for **500** facilities
- ✓ Over **99.9%** uptime and unlimited scaling
- ✓ Compatible with **hundreds** of IoT devices & meters
- ✓ **\$100M** total savings identified for our customers

## Features

### Advanced Analytics

Establish KPIs, generate intelligent targets, identify savings and perform project monitoring and verification.

### Flexible Data Integration

Collect data from a wide range of locations, systems and formats, including FTP(s), HTTP(s), process historians & IoT devices.

### User Customization

From asset monitoring to facility benchmarking, all reports, live dashboards and presentations are user customizable.

### Machine Learning

Our advanced analytics module utilizes machine learning algorithms to enable asset optimization and maximize cost savings.

### Automated Alerts

Set targets and receive real-time notifications to ensure optimal asset, area or departmental performance.

### Schematic Builder

Build system models, map on meter data and visualize performance with our intuitive schematic builder component.

## Our Software Customers

“ioTORQ is our trusted energy management and reporting system”

**GLOBAL EHS STANDARDS MANAGER**

“With ioTORQ we have delivered utility performance gains across our facilities”

**SUSTAINABILITY DIRECTOR**

“ioTORQ is our preferred Strategic Energy Management software platform”

**BUSINESS DEVELOPMENT MANAGER**
