

SITE RELIABILITY ENGINEERING

Keeping business systems up and running is paramount to maintaining a competitive edge. By automating formerly manual and repetitive processes, you can increase accuracy while enhancing efficiencies for your application and site monitoring.

Automation is the name of the game.

27Global's hands-on, proactive approach to site reliability – and our talented team of Site Reliability Engineers (SRE) – keeps an environment on and a system running smoothly so you can focus on running your business.

By building in automation at the code level along with service level monitoring, our SRE team will enable you to focus on more strategic, higher-level work that takes your business performance to new levels.

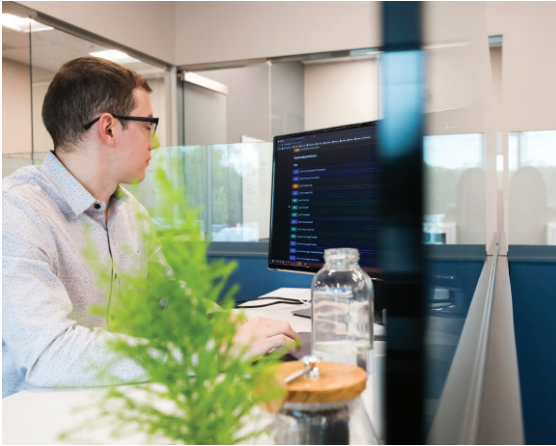

The 27Global Approach

Our SRE practice takes the DevOps philosophy and puts it into practice to provide insights into what is happening within your environment. By continuously monitoring trends that could morph into larger issues, our proactive SRE approach ensures that potential disruptions are identified and solved before they even occur.

Our Specializations

- Automation
- Infrastructure-as-code, integrated CI/CD pipelines
- Push-button deployments and environment ephemerality
- Security controls & access management
- Monitoring & logging tools, system notifications/alerts
- Monitoring dashboards
- Incident response
- KPI & service level objective management & reporting
- Application Performance Monitoring (APM)
- Disaster recovery planning & orchestration

SITE RELIABILITY ENGINEERING

Why 27Global?

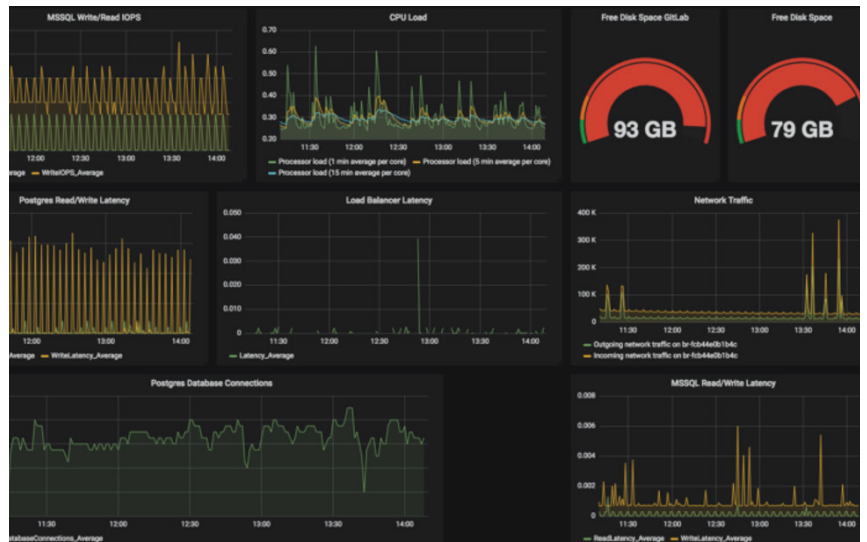

When it comes to ensuring the reliability of your mission critical systems, you need a trusted partner who understands services up to and including the application layer.

With software and cloud engineering as 27Global's core business, **this is our home turf.**

The 27Global Difference

Our proactive approach to SRE means issues are found before they impact your business and customers. Performance and cost efficiency is constantly improving. By leveraging 27Global's SRE team, you can rest easy knowing your business systems are healthy and your team can focus on the innovation necessary to stay competitive.

You shouldn't have to worry about your site reliability. **Let 27Global help you innovate with confidence.**

Founded in 2008, 27Global offers forward-thinking businesses custom development and tech strategies that help them elevate their competitive advantage. Created by local and global teams that take the time to discover your business needs and then assemble a solution that works for you and your processes, 27Global has the business acumen to understand your vision and the expertise to build your software solution.
