

# CGI All Payments

## Accelerate your payments transformation

Whether the goal is to achieve the promise of real time, or meet immediate compliance mandates, financial institutions each must choose their own path for payments transformation. As a trusted advisor for more than 40 years, CGI guides clients along their journey—from assessing where they are today and taking them where they want to be.

CGI All Payments is a modern, modular, cloud-ready solution built on global industry standards to ensure your payments business is future proof. It helps you increase revenue by reducing transaction costs and time to market for new revenue streams. Customers also benefit from a wide range of payment choices and the ability to transfer and receive funds 24/7/365. As an integrated software platform for processing real-time, wire and ACH payments, CGI All Payments' built-in workflow engine helps automate the processing of payment transactions to reduce manual processing while improving straight-through processing (STP) rates across all payment types.

With CGI's industry expertise and technical leadership, access to the latest payment channels is available anytime to ensure your business keeps up with customer demands, industry standards and compliance mandates. CGI All Payments enables banks to drive revenue and achieve differentiation by:

- Adopting APIs to enhance the banking experience and stay ahead of new regulations such as Open Banking in the UK, which is driving online and mobile payment innovation
- Providing new and innovative services such as SWIFT Global Payments Innovation (GPI) and real-time payments to wholesale and retail clients
- Delivering a consistent and improved customer experience that enables instantaneous transfer and receipt of funds 24/7/365, with supportive data presented consistently
- Leveraging data to build detailed trend analyses to gain insight into customer needs to drive development of value-added services
- Monitoring liquidity thresholds and allowing adjustments at the touch of a button to address customer demands and changing business and market conditions
- Balancing exception processing requests with internal STP targets

### CGI is a company of firsts in the payments industry

We are anticipating and proactively driving payments innovation for clients to become market leaders:

- CGI processes 40% of global FX settlement volume
- Over 20% of SWIFT payment transactions are processed by CGI
- CGI All Payments provides improved straight-through processing and full payment service capability
- CGI handles over 35% of all U.S. wire-based transaction volume (~\$3 trillion to \$5 trillion USD per day)
- Relationships with our top 10 banking clients globally span an average of 27 years

## Key features

CGI All Payments is a flexible platform that handles leading payment types—anytime, anywhere, regardless of the settlement and clearing network it's riding on. Developed as a modern, integrated and flexible payment services hub, it offers everything you need to transform your payments environment into an efficient, full-service, money-moving operation that adds value for your customers and improves your bottom line. CGI All Payments is:

- **Global:** Supports multiple currencies and languages, and as many payments channels as required worldwide
- **User-centric:** Provides an intuitive user interface with access to a set of dynamic dashboards and visibility into customized workflows; on-the-fly changes can be made to payments rules to ensure the rules are up to date, and operational staff can make adjustments directly
- **API-enabled:** Promotes back-office efficiencies and enhances the front-end experience for customers
- **Built for scalability:** Delivers on-demand performance you can count on, adjusting processing power to scale up instantly when you need it and reducing costs of increased capacity through efficiency gains
- **Cloud proven:** Supports full deployment across multiple ecosystems, either in the cloud or on premise
- **Smart and intuitive:** Enables workflow pattern matching and auto repair through process automation, improving STP
- **Flexible:** Provides options for adding or replacing only the payment functionality and clearing networks you require through a modular architecture
- **Secure:** Ensures the highest level of security through industry accepted approaches such as WSO2 Identity Server and Federated SSO via SAML2
- **Compliant:** Delivers ISO 20022 compliance out of the box, supporting needs today and the flexibility to meet future mandates

With our deep expertise and industry knowledge embedded in the platform, CGI All Payments helps clients achieve their goals for real-time payments today, and into the future—enabling the introduction of innovative services, faster processing, lower costs and greater transparency.

With the option to run on an on-premise, SaaS or cloud platform, clients can choose the delivery option that best meets their needs for capacity today, but is scalable for tomorrow. As an independent provider, CGI offers a solution that is fully deployable across multiple ecosystems.
