 - ▶ Device Management
 - ▶ Application Management
 - ▶ Compliance and Conditional Access
 - ▶ Intune Solves Business Problems
 - ▶ Autopilot
 - ▶ Windows Update for Business

Overview

- ▶ Endpoint Management and Protection
 - ▶ Manage endpoints in one place
 - ▶ Powerful data and device protection
 - ▶ Lower total cost of ownership

Simplify Endpoint Management

- ▶ Unify Endpoint Management Solutions
 - ▶ Reduce complexity for IT and security operations

Strengthen Security

- ▶ Ensure device health and compliance
 - ▶ Use Microsoft Security signals
 - ▶ Advanced endpoint management capabilities
- ▶ Mitigate cyberthreats
- ▶ Protect corporate data

Reduce Overall Costs

**Consolidate vendors to
increase efficiency**

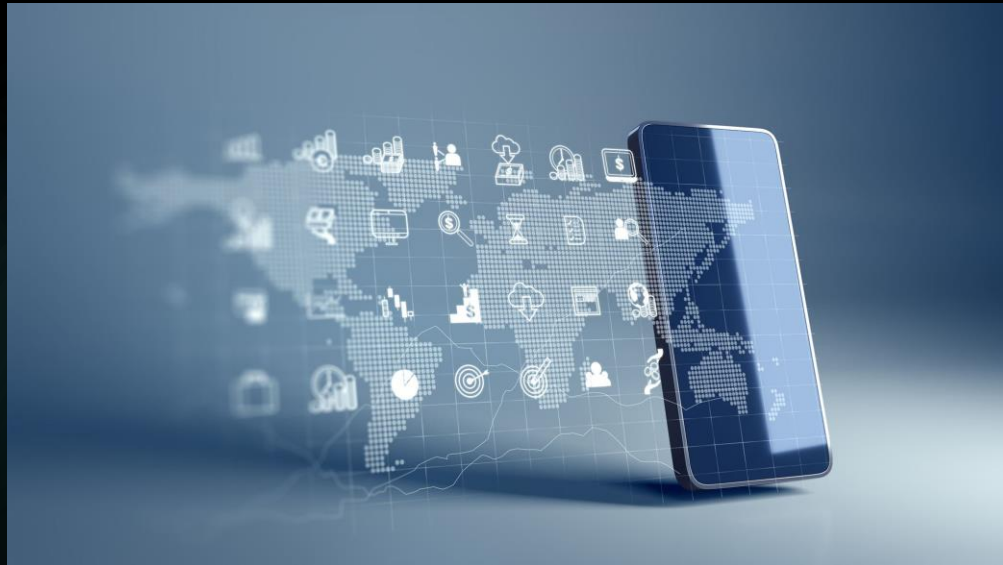

Save more with cost-effective licensing

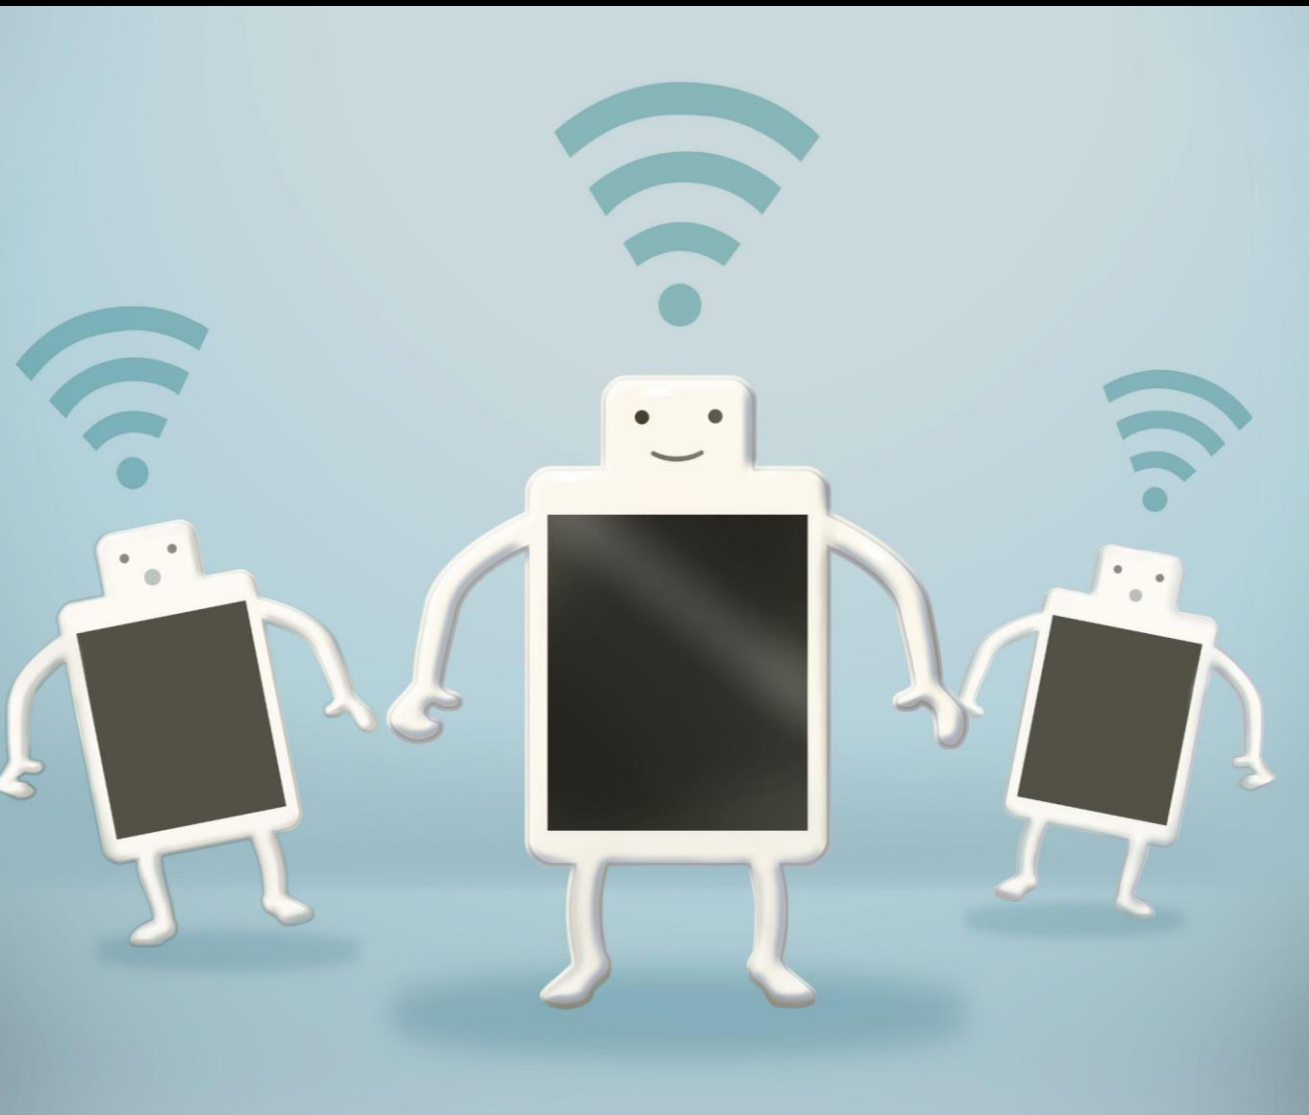

**Improve end-user productivity
and performance**

Enhance performance across devices

Intune Simplifies App Management

- ▶ Built-in app experience
 - ▶ App deployment, updates, and removal
- ▶ Connect to and distribute apps from private app stores
 - ▶ Enable Microsoft 365 apps
 - ▶ Deploy Win32 apps
- ▶ Create app protection policies
 - ▶ Manage access to apps and their data

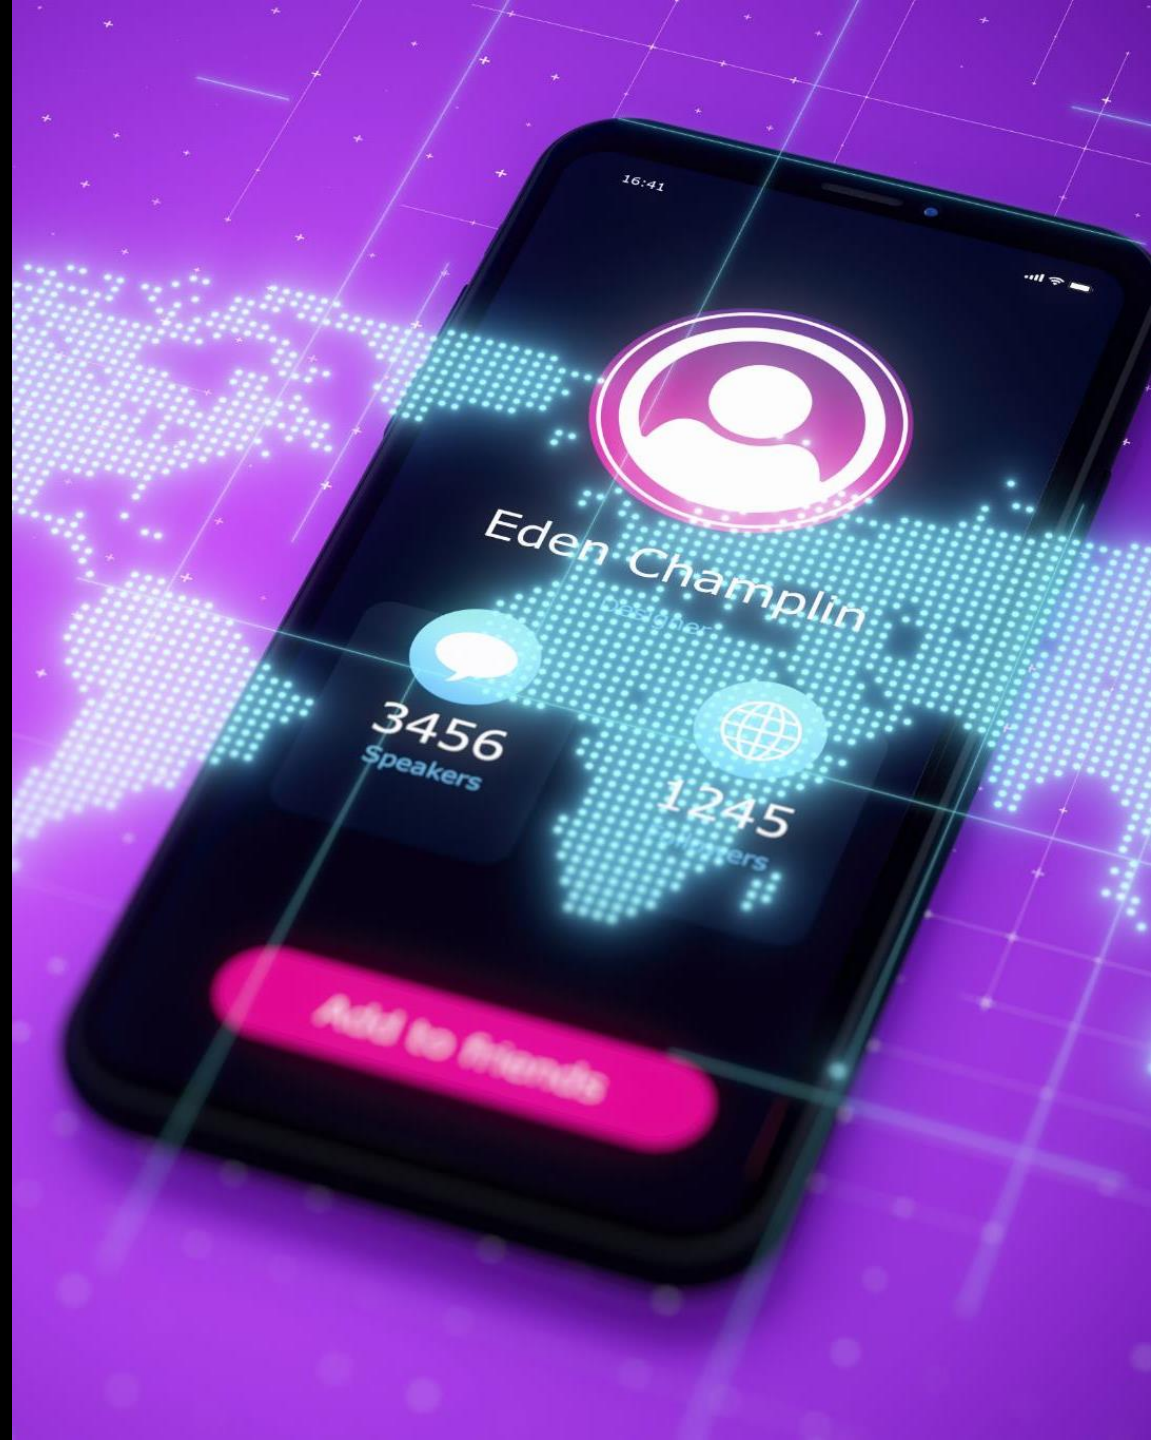

Actions with Intune: Device Management

- ▶ Intune provides flexibility in managing devices
 - ▶ Company-owned or BYOD
 - ▶ Windows, Mac, iOS, or Android
- ▶ Track enrolled devices and configure policies
- ▶ Safeguard company assets and data

Actions with Intune: Application Management

- ▶ Intune protects organization data at the application level, not the device level
 - ▶ Includes both custom apps and store apps
- ▶ Allows use of favorite workplace apps while maintaining security

Actions with Intune: Compliance and Conditional Access

- ▶ Intune integrates with Azure AD for access control
 - ▶ Enables a broad set of access control scenarios
- ▶ Automates policy deployment for:
 - ▶ Apps
 - ▶ Security
 - ▶ Device configuration
 - ▶ Compliance
 - ▶ Conditional access

Actions with Intune: Intune Solves Business Problems

- ▶ Intune simplifies mobile device management (MDM) and mobile application management (MAM)
 - ▶ Keeps your organization's data protected
- ▶ Relevant for today's work-from-home environment

Actions with Intune: Autopilot

- ▶ Intune Autopilot streamlines device provisioning and setup
 - ▶ Makes it easier for users to get started with their devices

Actions with Intune: Windows Update for Business

- ▶ Intune helps manage Windows updates efficiently
 - ▶ Ensures devices stay secure and up-to-date
