

Accelerate Business Decisions With SAP Data Automation

Turn Microsoft Excel Into Your SAP Data Management Command Center With Process Runner and Save up to 90% on Your SAP Data Processing Times

Process Runner

from insightsoftware

Simple, Powerful Data Management

Give data management power to your business users. Using Microsoft Excel, they can manage and automate SAP data without coding, advanced training, or waiting for a Legacy System Migration Workbench from IT.

Data Conversion in a Snap

Quickly convert, cleanse, monitor, and migrate your SAP data. Load test data during process simulations or training preparation. Get last-minute data fixes during critical data conversion rehearsals and cutovers.

Over 1,900 Quick-Activation Templates

Each ready-to-run template from the cloud library includes an Excel file and automation script fully recorded and mapped. Process faster so you can take on other projects.

Easy Data Validation

From Process Runner's control panel, easily monitor user access across the enterprise by setting data validation rules to prevent erroneous uploads to SAP. Debug data issues before loading your data into SAP.

Automation for Any SAP Module Transaction
