

Elevate Your Security Posture with Microsoft: Microsoft Security Overview Briefing

Microsoft Security Strategy Briefing

Bring your team to this in-person or remote strategy session where we will review your business objectives, discover your current environment state, identify gaps to success and review the latest in Microsoft Security technologies. Whether your team is new to Microsoft Security or already in a production rollout, our solution architects will educate your team on the latest developments and strategies for elevating your Security Posture and Reducing your risk with Microsoft technologies such as;

- Zero Trust Framework
- Hybrid/Multi Cloud Security Posture
- Identity and Access Governance
- Secure Service Edge
- Email and Productivity Application Security
- Data Governance and Insider Risk Management
- Modern Security Operations and Data Intelligence
- Introduction to our CISO and product Specific Workshops.

Objectives Include:

- Current state review of existing environment
- Identity business objectives and use cases for modern endpoint technologies
- Establish clear, concise next steps for Adopting Microsoft Security Solutions
- Hands on with Microsoft Security Environment
- Educate Customer team on latest Security technology developments from Microsoft
- Learn through “art of the possible” demonstrations

Why CDI?

CDI LLC has over 25 years of experience in providing technology solutions to businesses across various industries. Our team of experts has the expertise to design, implement, and manage complex technology solutions, ensuring that clients achieve their desired outcomes.

We can provide end-to-end solutions, from consultation to implementation and ongoing support. We also offer a wide range of services, including cloud computing, cybersecurity, networking, data center solutions, and more, to meet the diverse needs of businesses.

Solutions are built with quality assurance in mind, ensuring that we are reliable, scalable, and secure. We also provide ongoing monitoring and maintenance to ensure that solutions continue to perform at optimal levels. CDI works closely with clients to understand their unique needs, and their solutions are designed to meet those needs.
