

# Azure Virtual Desktop

## Are your tools up to the challenge?

Competing in the modern economy requires a modern workforce. Your employees need access to their tools whether they are at their desk, in the field, or working from home.

## Desktop virtualization allows your employees the flexibility they need and the security you need

**Azure Virtual Desktop (AVD) is a comprehensive desktop and app visualization service running in the cloud.** It's the only virtual desktop infrastructure (VDI) that delivers simplified management, multi-session Windows, Microsoft 365 apps optimizations, and support for Remote Desktop Services (RDS) environments. Synergy Technical can help you quickly deploy and scale your Windows desktops and apps on Azure in minutes and get built-in security and compliance features.

## Azure Virtual Desktop is:

- Secure by design
  - With Azure Virtual Desktop employees can securely connect to their desktop anywhere with internet access.
- Lower cost than traditional VDI solutions
  - AVD will work with any budget. Use your qualifying Microsoft 365 or Windows licenses to get the best price available.
- The best user experience anywhere
  - Files automatically load to virtual desktops, so employees can quickly access important information from any eligible device.

## Why work with us?

Synergy Technical has a long history of delivering successful cloud and on-premises security solutions to customers. With experience in all 50 states and 70+ countries, we have the technical expertise to get you up and running fast.
