SULLEXIS

Microsoft Purview:
12-Week Data Catalog FastTrack ≫

Accelerate the process to discover, understand and govern your data effectively.

PROBLEMS FACED

When it comes to analytics and AI, businesses typically experience at least 1 of 3 major pain points:

1. Too many reports & conflicting business definitions

2. Sanctioned & Unsanctioned data sources with unclear data definitions

3. Unchecked report & data growth and maintenance

SOLUTION OVERVIEW

In 12-weeks, Sullexis will design and implement a solution combining its data management methodology with the Microsoft Purview components needed to enable Analytics and AI use cases. This tailored approach amplifies the value harnessed from Microsoft Purview and provides a sustainable approach to unlock new Analytics and AI use cases.

SULLEXIS DELIVERY PROCESS

Identify
Design & Organize Data Glossary and Catalog Structure in Collaboration with Business Stakeholders and Governance Processes

Configure
Scan EDW, Data Lake, Lakehouse and Power BI to Populate Data Catalog & Build/Prioritize a Backlog
