

SAP LANDSCAPE REFRESH AUTOMATION

EXPERIENCE OUR UNPARALLELED SUPPORT AND
GUIDANCE EVERY STEP OF THE WAY!

Driving Meaningful Impact.

SAP LANDSCAPE REFRESH AUTOMATION.

At the heart of every successful enterprise lies a robust application landscape, serving as the backbone of operations. Yet, agility and efficiency are paramount in the dynamic realm of business. Mission critical Enterprise solutions typically require development and quality assurance systems as part of their non-production landscape. The process of resetting these from production copies can be cumbersome and unpredictable, leading to weekend hours spent troubleshooting and sometimes delays to projects dependent on them.

With the plethora of IT systems typically deployed no two landscapes are the same. And that's why you need a solution tailored to your unique systems and processes. BCS offers SAP Landscape Refresh Automation, your gateway to seamless, rapid, and error-free Test Data Management. Or if you want, BCS can fully manage the entire end-2-end data refresh with our managed service offering: Refresh-as-a-Service. Choose what best suits your needs..

STREAMLINED OPERATIONS AND ACCELERATED TIME-TO-VALUE.

At the heart of every successful enterprise lies a robust application landscape, serving as the backbone of operations. Yet, agility and efficiency are paramount in the dynamic realm of business. Mission critical Enterprise solutions typically require development and quality assurance systems as part of their non-production landscape. The process of resetting these from production copies can be cumbersome and unpredictable, leading to weekend hours spent troubleshooting and sometimes delays to projects dependent on them.

With the plethora of IT systems typically deployed no two landscapes are the same. And that's why you need a solution tailored to your unique systems and processes. BCS offers SAP Landscape Refresh Automation, your gateway to seamless, rapid, and error-free Test Data Management.

SCALABLE, FLEXIBLE, AND COST – EFFICIENT.

Experience cost optimization without compromise. By automating repetitive tasks and reducing manual intervention, you unlock significant cost savings while enhancing operational efficiency. Whether you manage a single refresh or your entire landscape in parallel, our SAP Landscape Refresh Automation scales effortlessly to meet your Test Data Requirements and delivers tangible ROI by streamlining processes and maximizing resource utilization.

MANAGED END-2-END DATA REFRESHES BY BCS?

Refresh-as-a-Service revolutionizes your SAP landscape management with a fully managed automated refresh and scrambling service. Offering a scalable solution for businesses seeking efficiency and security in their SAP environments. Transform your ERP system management with our expertly crafted service, designed for seamless integration and continuous optimization.

CUSTOMER STORIES

ORCHESTRATION IMPACT AT OUR CLIENTS!

GLOBAL BREWING LEADER. A REFRESHING COMBINATION.

This customer story with BCS showcases how a global brewing leader leveraged BCS's Symphony platform, in combination with Data Sync Manager (DSM) from EPI-USE Labs and DATPROF, to significantly enhance their SAP and non-SAP ERP landscape management. By automating data refresh and scrambling processes, the customer achieved remarkable results: updating 70 systems across 21 countries with a single click on a button. This led to substantial efficiency gains, including a 67% data reduction and the completion of 2000+ scenarios tested in just 3 days. This story highlights BCS's ability to deliver sophisticated, user-friendly solutions that drive agility, minimize errors, and optimize costs, underscoring its commitment to transforming business infrastructures and processes.

INTERNATIONAL FASHION RETAILER. SEAMLESS ORCHESTRATION.

Our customer, one of the most admired fashion and lifestyle companies, embarked on a transformative journey with BCS's Symphony platform to overhaul their SAP landscape refresh processes. Facing the challenge of lengthy and complex data refresh cycles, they sought to enhance efficiency, minimize downtime, and automate end-to-end test data refreshes. Leveraging Symphony's advanced orchestration capabilities, the fashion retailer achieved significant reductions in refresh duration, ensuring their SAP environments remained agile, up-to-date, and secure. This success story not only underscores customer's commitment to operational excellence but also highlights the power of Symphony in enabling seamless, automated SAP landscape management for leading global enterprises.
