

Xcelerate: Business Central Distribution Enhanced Add-On

\$34,500

The ideal choice for businesses with complex distribution needs that require sophisticated tools for inventory, warehouse, sales, and purchasing operations; Xcelerate Business Central Distribution Enhanced was designed for growing businesses that need to optimize their supply chain and distribution networks for peak efficiency and strategic insight

Designed to integrate with the core Xcelerate Business Central Finance packages, the Distribution Enhanced package is the ultimate solution for businesses seeking the most complete platform for their expanding distribution needs that will propel your business forward.

The Distribution Enhanced package is the pinnacle Xcelerate offering for small to medium-sized businesses requiring comprehensive advanced distribution management capabilities with features like advanced warehouse management, detailed item tracking, and full integration with core financials.

KEY BENEFITS

Sophisticated Inventory Management	Utilize advanced item tracking capabilities, including serial and lot number tracking, to maintain impeccable inventory records.
Comprehensive Sales Tools	Leverage enhanced sales order processing, including prepayments, blanket orders, and detailed pricing and discounting strategies, to maximize revenue.
Dynamic Purchasing Operations	Benefit from a comprehensive set of tools, including purchase prepayments and requisition worksheets, to streamline purchasing processes.
Streamlined Warehouse Efficiency	Advanced warehouse management, including detailed bin and item tracking, ensures that every item is accounted for and efficiently managed.
Smart Assembly and Kitting	Efficiently plan and execute assembly operations with detailed bills of materials and kitting strategies that save time and reduce costs.
