

Built for Contact Centers, AI Developers, and more... for Microsoft Teams

Product Summary

Numonix's Microsoft Teams Recording as a Service (TRaaS) is designed for developers, integrators or large organizations seeking a robust and easy-to-use cloud-native recording solution.

With Numonix TRaaS, you can effortlessly hook into Microsoft Teams and access high-quality media in a centralized cloud-native solution.

Fueling Business Intelligence ▼

Powerful architecture allows you to utilize underlying capture data, eliminating the complexities of certification, maintenance, and support. You can focus on leveraging the captured data to fuel your business intelligence.

Flexible & Quick Deployment ▼

Choose between a hosted and managed environment or deploy and store your recordings in Azure BLOB storage or S3 buckets, giving you the flexibility to store and utilize the data wherever you require, ensuring maximum flexibility and control.

Simplified Certification ▼

Leave the certification, maintenance, and support to us. Our solution is certified and compatible with Microsoft Teams, ensuring compliance and reliability. Numonix's TRaaS solution is fully managed, freeing you from technical burdens and enabling you to focus on what matters most.
