Fabric Solution in 30 Days (FAi30)

Create a Microsoft Fabric data and analytics solution quickly and efficiently!

The Challenge

The most common challenge in enterprise data estates is that companies evolved to a ton of data and infrastructure redundancy. There are often multiple teams operating silos of data and the platforms required are inherently very technical and fragmented. *Stitching* together the unique analytics tools is complicated. Microsoft Fabric solves these problems, however, that doesn't mean you know where to start!!!

The Solution

Our Fabric Solution in 30 Days (FAi30) is designed to help you create a Fabric Solution quickly and effectively. We have well-defined engineering approaches to support the Fabric "Lakehouse" or "Warehouse" that make *sewing* data together fast and easy. With prebuilt templates, adoption guidance, governance and development standards, your Fabric solution will be *threading* data together before you know it.

With our offer, your business will be able to:

- Simplify the ingestion of data sources to support analytics
- Quickly integrate intelligent apps with ML/AI capabilities into Fabric
- Understand Microsoft Fabric, its capabilities, and best practices
- Realize the benefits of a lakehouse and warehouse on Fabric
- Establish an MVP governance and adoption framework
- Envision cloud analytics at scale and throughout the enterprise

The FAi30 Approach

- *Strategy & Plan*
  - Governance, analytics, and architecture workshops

- *Ready & Govern*
  - Implement Fabric governance & security

- *Design & Innovate*
  - Model the data and sketch out the app or report screens

- *Transition*
  - Get your solution into the hands of users, get feedback, and decide what to change or add

FAi30 Benefits: Governance → Time to Market → Flexibility → Repeatability

Spyglass MTG Can Help!

We can help you create a Fabric Solution in Azure quickly and efficiently. Contact us today!

About Spyglass MTG- A Women Owned/Women Led Company

For over 15 years, we've partnered with Microsoft to expertly deliver their vast and ever-evolving suite of enterprise solutions to clients. Specializing in Data, AI, and Security services on the Microsoft clouds, we can help you select, architect, implement, migrate to, and manage your Microsoft products. With Spyglass as your trusted ally, you can securely harness the power of Microsoft technology to drive strategic business decisions, optimize processes, predict customer behavior, spot market trends, and empower your business to stay ahead in today's competitive landscape.
