## Azure Virtual Desktop (AVD)

Set your business, workforce and IT department free with the best virtual desktop experience, delivered on Azure.

The challenge of today's uncertain economic landscape has forced us to adapt quickly to ensure we can work safely, securely, efficiently – and remotely. AVD's ability to provide rapid access to the cloud has meant that it's become the virtualisation solution of choice for thousands of businesses.

## Why choose Azure Virtual Desktop

The challenging environment in which we currently find ourselves has forced us to adapt quickly to ensure we can work safely, securely and efficiently – remotely. With Azure Virtual Desktop containing all the attributes for rapid access to the cloud, it's become the solution of choice to meet your virtualisation needs.

The way Microsoft 365 enables customers to shift to a modern desktop experience puts it at the heart of workplace transformation. A modern desktop with Windows 10 and M365 not only offers the most productive and most secure computing experience, it also saves IT time and money, and allows for a focus on driving business results. For many companies, their specific needs require a modern desktop to be virtualised.

### Multi-session experience

Provide your users with the only multi-session Windows 10 desktop virtualised in the cloud that's highly scalable, always up to date, and available on any device.

### Migrate to Azure

Migrate your Remote Desktop Services (RDS) environment with simplified management and deployment experience on Azure.

### Deploy and scale in minutes

Quickly virtualise and deploy modern and legacy desktop apps to the cloud in minutes with unified management in the Azure portal.

### The best O365 experience

Deliver the best Office 365 experience, with multi-session virtual desktop scenarios to provide the most productive virtualised experience for your users.

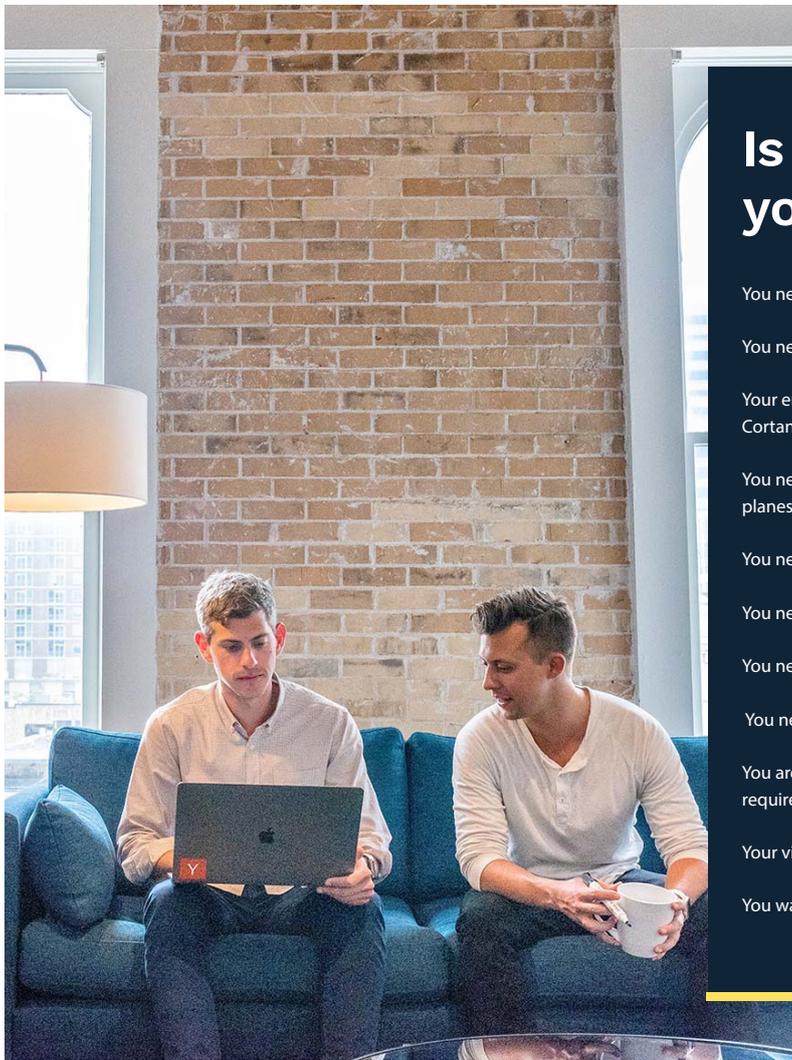

### The complete solution

Deploy a complete, intelligent solution that enhances creativity and collaboration for everyone all in one simple move.

### Significantly reduce costs

AVD saves IT time and money and allowing you to focus on meeting business objectives. User efficiency and security is maximised, plus overheads are reduced.

## Is AVD the right fit for you?

You need the ability to add users quickly and easily.

You need to scale efficiently on demand.

Your end-users need a seamless rich client experience with Outlook, Search, Cortana, OneDrive.

You need to manage different deployment types across different deployment planes.

You need to bring Remote Desktop Services (RDS) to your users.

You need to support both persistent and non-persistent environments.

You need integrated security and management e.g. Microsoft 365, AAD.

You need to run Windows 7 legacy applications post Win 7 EOL.

You are in a regulated industry and need to meet strict compliance requirements.

Your virtual desktop journey requires reuse of existing investments (e.g. Citrix).

You want to reduce management and deployment costs for Windows Server.

## How we can help you

HTG can rapidly deploy a secure working environment to help in times of crisis or otherwise and since its recent inception, we've been instrumental in successfully deploying the AVD solution to customers across industries including the housing and financial sectors.

Not only are we well placed to deliver AVD but we offer an end to end, bespoke managed service. Built upon cutting-edge, enterprise-grade technology to guarantee outstanding performance, our highly trained, in-house solutions experts can design and build a solution to meet your needs. We can then provide that all important support to ensure peace of mind.

### Our organisation

At HTG, we believe in that winning combination: teamwork and technology. Find out more about their team, their areas of expertise and qualifications.
