Azure  
Landing Zone Creation

Group Econocom

# Cloud adoption

## Unlock the potential

# Why a landing zone

The **foundation** of your cloud environment

- is the environment that is provisioned to host workloads being migrated from an on-premises environment into Azure.
- provides a scalable and modular platform
- is an essential part of the adoption journey (Microsoft CAF)
- enables migrations as well as net new apps
- is well-architected, built on solid practises, reference architectures and design considerations

Viewpoint taken from 8 **critical design area**

- any decisions made against these area will have a significant impact
- the areas are heavily linked, so decisions made in one area impact others, and vice versa

# Azure landing zones

## Design areas

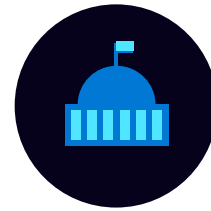

Enterprise Enrollment

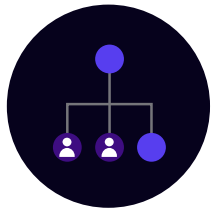

Business Continuity  
& Disaster Recovery

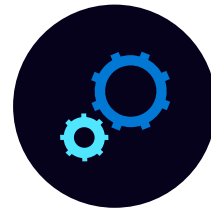

Identity

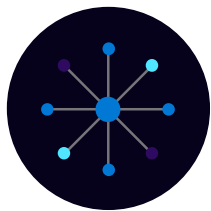

Governance Disciplines

Resource Organization

Deployment Options

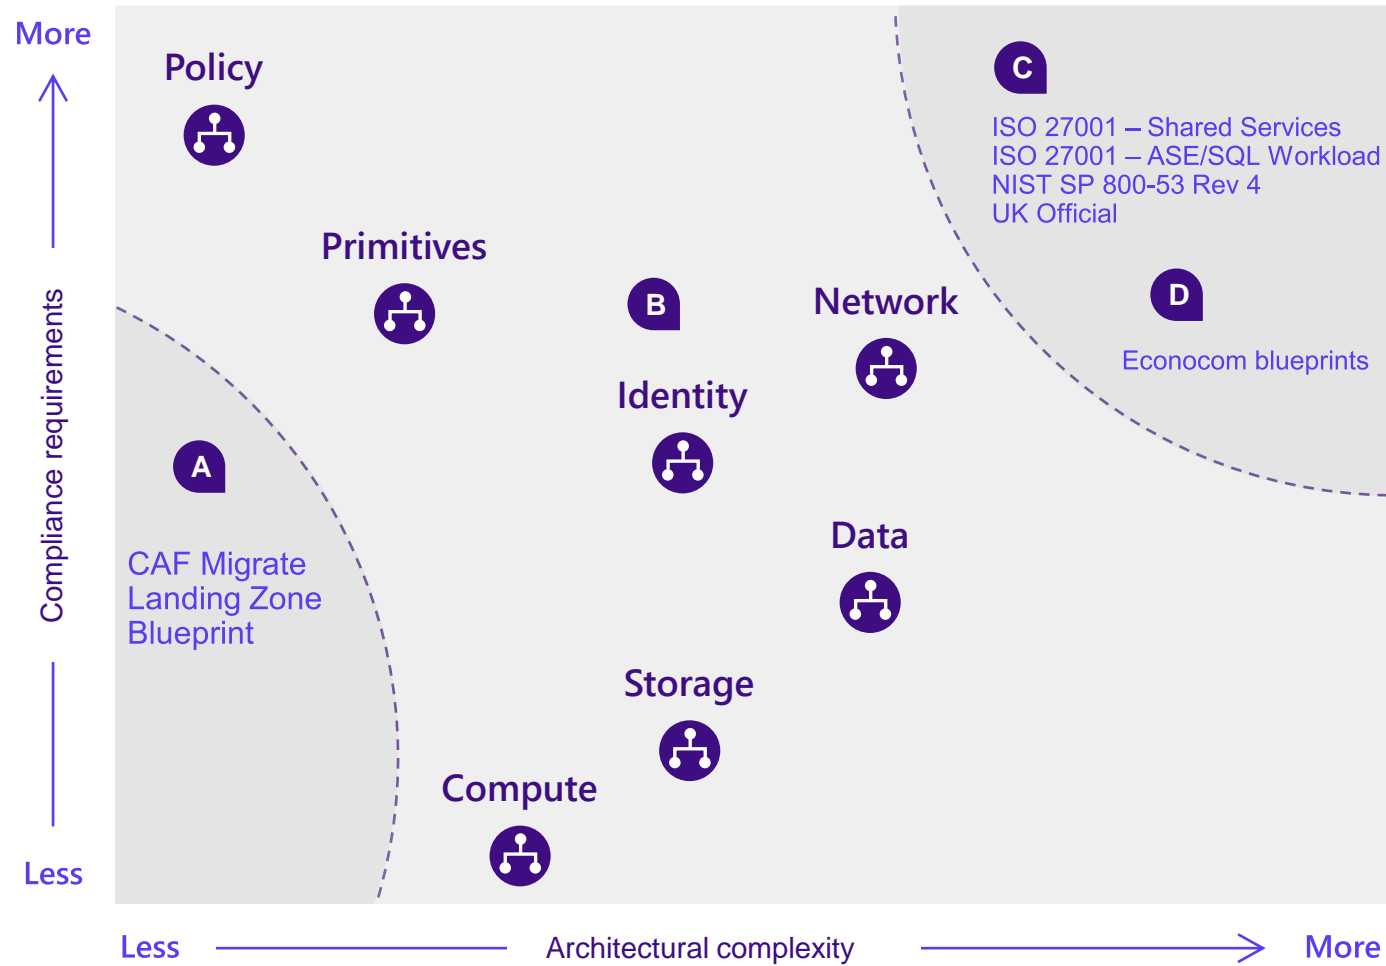

Network Topology  
& Connectivity

Operations Baseline

# Blueprints

## Start small, expand later

# Design in 7 workshops

1	Kick-off
	Scan of the existing
2	Identity and resource organisation
3	Network and connectivity
4	Security and compliance
5	Governance
6	Deployment options and operations
	Design
7	Report

**Thank you**
