

Continua Gas Solutions

Monitoring, Control & Management of Gas Pipelines

A comprehensive suite of monitoring, control, and management software applications specifically intended for the supervisory control and analysis of the operations and performance of modern gas gathering, transmission, and distribution pipelines and storage facilities. It provides an unprecedented number of real-time applications to allow pipeline controllers to operate their gas pipelines safely, reliably, and efficiently..

See what customers are saying:

The CPS Energy team worked with AspenTech to learn and deploy the new monarch SCADA system and cutover and go-live were both "uneventful" events. Project support transitioned to the next phase immediately after the "1000 hours test".

CPS Energy

MEET ENERGY DEMANDS

Continua Gas Solutions (CGS) is built atop OSI's industry-leading monarch™ operational technology (OT) platform. The monarch™ platform is a state-of-the-art, real-time system architecture by OSI that supports high-performance and mission-critical applications for monitoring and control of critical infrastructure assets.

Continua Gas Solutions (CGS) provides an unprecedented number of applications for the gas industry, both from an offline and operational point of view. The Continua Gas Solutions' (GCS) modular design is unique and provides a simplicity that makes it user friendly, scalable, safe, and easy to maintain

Why Microsoft Azure?

Be future-ready

Continuous innovation from Microsoft supports your development today, and your product visions for tomorrow. With 1,000+ new capabilities in the past year, you can build on the latest advancements in AI, blockchain, Kubernetes, containers, and databases to keep you ahead of the curve.

Our enterprise grade analytics solution outperforms the competition, costs less, and is fully compatible with your existing development, BI, and data-science tools.

Operate hybrid seamlessly

On-premises, in the cloud, and at the edge—we'll meet you where you are. Integrate and manage your environments with tools and services designed for hybrid cloud.

Enhance security, simplify access, and set smart policies across your different environments with a single-identity platform trusted by 90% of enterprises globally.

Build on your terms

You have choices. With a commitment to open source and support for all languages and frameworks, build and deploy how you want to. Take advantage of the full-featured, integrated development environments with built-in support Visual Studio and Visual Studio Code, the most popular IDEs trusted by 15M+ developers.

We embrace open source, drive innovation through collaboration, and contribute back to the community.

Trust your cloud

Get security from the ground up, backed by a team of experts, and proactive compliance trusted by enterprises, governments, and startups.

With a \$1B+ investment in security R&D and 3,500 cybersecurity experts, security is foundational for Azure.

Microsoft Azure is an ever-expanding set of cloud computing services to help your organization meet its business challenges. With Azure, your business or organization has the freedom to build, manage, and deploy applications on a massive, global network using your preferred tools and frameworks.
