

The SaaS platform to verify qualifications, certifications and identity of your workforce and contractors in real-time.

Key benefits

- Unlock the day-to-day operational utility and value of workplace credentials for individuals and businesses across industries.
- Save time and reduce cost when issuing verifying and managing digital credentials.
- A convenient and accessible way for individuals to own, manage and share their credentials with third parties.
- Meet compliance and regulatory obligations with real-time reporting across multiple locations.
- Workforce training, capability and competency updates are visible in real-time.
- Interoperability with other workforce management and business systems.

A world class SaaS platform

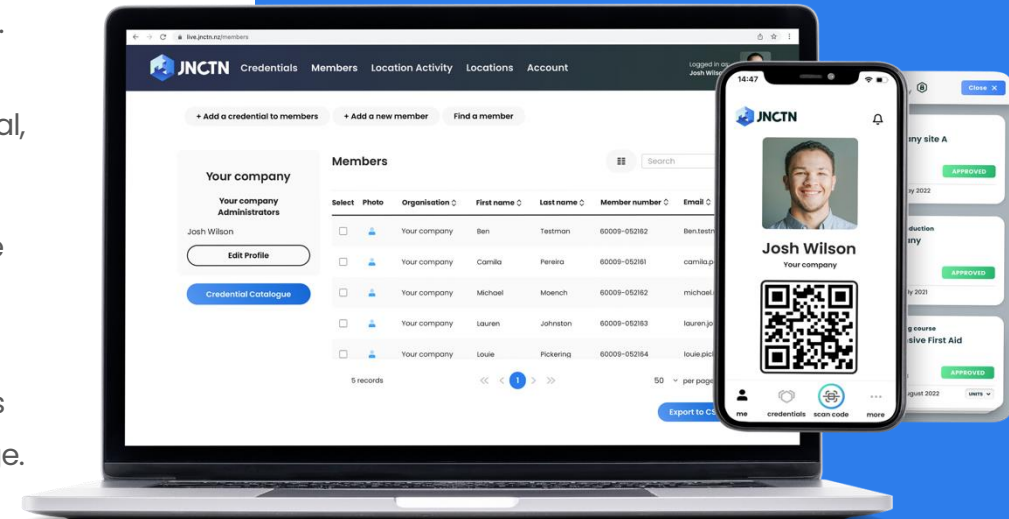

- Admin Portal, App, digital wallet and dashboards to create, issue, share, verify and revoke credentials.
- Credentials can range from identity, inductions, courses, licences, qualifications, assessments, work authorities to health requirements and more .
- Simple UI to create your own custom credentials or use APIs to existing systems and data sources.
- Notifications for expiry, renewal and exceptions.
- Customisable business rules engine for credential, location and site access management – BYO business process and logic.
- Location Activity Management module to ensure individuals accessing your work environments are authorized.
- Real-time, auditable reporting on credential status and compliance across multiple locations
- Data for compliance reporting and incident triage.

“The benefit of assigning credentials at the time of training is huge. How easily our records can be transferred is a real game changer for us.”

Jarrold Bowler
Safety & Wellness Manager
Genesis Energy

[Watch](#) how StayLive have used JNCTN to manage competency across the energy sector.

Automate onboarding, issue permits to work and quickly build your pre-qualified, work-ready workforce.

Why JNCTN works for you

Our platform delivers a wide array of benefits, leading to significant efficiency gains. Customers have reported remarkable results, **saving up to 20%** on training costs and associated administrative tasks.

The JNCTN Admin Portal and App are accessible and inclusive, meeting the requirements of individuals' roles at all levels.

Individuals have their own personal digital wallet ensuring privacy is maintained without sacrificing convenience or control over their credentials.

With the creation of lifelong learning records, career growth is fueled, and work history is easily proven when moving between jobs and industries.

Streamline compliance processes and reporting, view workforce competency across locations, and reduce hiring costs.

Our platform ensures enterprises optimise governance and see gains in training, site management and access.

Built using open technical standards, using JNCTN ensures interoperability and synchronization with internal data, HR, and learning management systems.

"There's no better endorsement than how well this landed with the people who are using it every day.

Not only is it a simpler process to check peoples' credentials as they came on site, the backend integration and validation process gives everyone a higher degree of confidence and greater transparency about who is coming onto or leaving sites."

Ministry of Business Innovation and Employment
